West of England Partnership: Audit Commission Action Plan – Progress Report

Purpose

1. To update members on actions taken in response to the Action Plan agreed between the four authorities and the Audit Commission and to provide members with the Partnership's risk register.

Background

2. In summer 2009 the Audit Commission carried out a review of Governance Arrangements in the West of England Partnership. They focused on Waste Phase 3 as a case study, but also looked more broadly at the governance of the Partnership. Their report, which included an Action Plan, was published in December 2009.

Actions to date

3. The table set out in the Appendix sets out the recommendations and progress to date. The information in the 'Comments' column was provided by the Partnership Office, following discussion with council chief executives prior to the publication of the report in December 2009.

Corporate Risk Register

4. The attached register sets out the corporate risks and related management actions. Members are asked to note that all Partnership projects have their own risk registers.

Recommendation

That members consider the report and give their views.
