

# AGENDA ITEM NO. 10

BCR NEW Trees – Plan 2012/13, progress for 25.1.12 – Clive Stevens, John Tarlton, Vassili Papastavrou p 1

Following the summer survey of the 49 miles of BCR streets, the BCR Tree team suggest these as the first 30 candidate sites (Council land, not yet services searched) where upto 75 new trees might be planted. If many of the trees can be large species (e.g. >6m canopy radius) then that helps more towards the BCR NP target of 890 new trees in the next few decades (6m or more would need 445 trees to increase NP canopy by 1%)

### Process:

Councillor / Amenities Groups support / prioritisation please – **DONE**

Council have checked ownership of land – **All Council land except site #8 = B&Q**

Council to initiate services search and cost budget. Once results back, then Tree Team / NP to publicise, find some “private money” and put in application to NP to support the private money.

Consultation is required as these are new sites.

Three of these sites suggested are “visionary” (Bishopston #12, #14 and #15) By this we mean that they are non-standard plantings and require more imagination to appreciate their benefits.
