

Greater Fishponds Neighbourhood Partnership

Date: 21st June 2012

Title: Adjustments to Clean and Green Project Funding Criteria and Process; and Confirmation of decision-making process for Clean and Green funds.

Officer Presenting Report: Denise James, Area Environment Officer

Contact Telephone Number: 0117 922 1947

RECOMMENDATION

The Committee is asked to note the changes that apply to the Clean and Green fund from the date of the Partnership meeting to the end of the 2012/13 financial year.

The Committee is further asked to approve how it makes decisions on its devolved Clean and Green funding this year. The Committee must decide on one of the following two options:

Option A: To make all decisions at a Neighbourhood Partnership meeting;

Option B: To delegate the legal authority to make decision to officers in Environment and Leisure Services with an understanding that officers will subsequently seek Councillors agreement by email prior to spending funds.

Summary

The Clean and Green Project Fund has proved a popular and successful council initiative for a number of years.

There is a need to make some adjustments to the way the Council manages the fund to reflect changes in how it is administered and to make delivering environmental improvements more responsive to local need.

The significant issues in the report are:

- The level of funding devolved to Partnerships remains the same at £1500.
- The criteria have been relaxed to reflect Neighbourhoods' previous decisions.
- The Council is allocating £10K of the £29K non-devolved Clean and Green funds to supporting Community Payback. £19K remains to be applied for by Neighbourhoods.

Context

- i. The Clean and Green Project Fund has previously been managed by a dedicated project officer. This role is now carried out by Area Environment Officers in Environment Leisure Services.
- ii. The original criteria set for Clean and Green do not reflect the imaginative ways in which neighbourhoods wish to utilise the fund.
- iii. Proposals from neighbourhoods for Clean and Green funded environmental improvements have tended to be concentrated towards the end of the the financial year, causing bottlenecks.
- iv. The Probation Service has asked if the Council can provide a more consistent work stream throughout the year for the Community Payback scheme. This will bring more consistency and responsiveness to the services Community Payback offers.
- v. Area Environment Officers would like confirmation as to how the Committee wishes to make decisions on the Clean and Green funds devolved to it.

Changes made to Clean and Green fund:

- i. The Clean and Green scheme will be administered on behalf of each Partnership by its Area Environment Officer.
- ii. The criteria for the devolved element of Clean and Green have been relaxed - please see Appendix A:
 - a) The need to support 'gateways' in to the city has been removed.
 - b) The need to ensure that Clean and Green money is only spent on work not covered by the Council's contracted services has been removed. This will be down to the Councillors' discretion. The Area Environment Officer will advise. In some cases this will enable the Council to respond more quickly to communities' wishes.
- iii. The criteria for the £29K non-devolved element of Clean and Green have been amended:
 - a) The amount able to be applied for by Neighbourhood Partnerships has been reduced to £19K - please see Appendix B:
 - The need for Partnerships to have spent the devolved element of Clean and Green funding before being able to make an application to the fund has been removed.
 - As before, applications received for environmental improvements that take place in one of the five priority wards for cleanliness projects will take preference.
 - b) The remaining £10K is now set aside to support the Probation Service's Community Payback Scheme.

- This will pay for 100 Payback sessions in our communities.
- The Payback sessions will be administered by Area Environment Officers.
- Area Environment Officers will be proactive in ensuring that the work delivered by Payback responds to requests come from the local community and Neighbourhoods. However, prioritising a consistent work stream will mean officers will propose and instruct work on some occasions.
- Area Environment Officers will be mindful that this funding previously supported environmental improvements that took place in one of the five priority wards for cleanliness projects. The majority of this funding will continue to be spent in these wards.

Consultation

Internal

Pam Jones - Service Manager, Environment & Leisure Operations

Cllr Hopkins - Executive Member for Targeted Improvements

Appendices: Appendix A - Clean and Green Project description and criteria.

Appendix B - Criteria for £19K non-devolved Clean and Green funding

The Clean and Green Project

Clean and Green is a Council project designed to help communities enhance their local environment by cleaning up or making changes to streets and open spaces. It enables decisions on enhancements to be made locally by Neighbourhood Committees.

Any proposal can be put forward providing the following criteria are followed:

- The public environment is enhanced in some way.
- The improvements are suggested by the community and supported by the local Neighbourhood Committee.
- The money should ideally deliver work that is over and above that provided by the Council's contracted services. This is up to the discretion of the Neighbourhood Committee.

To achieve this the Council has devolved a Clean and Green budget of £1500 to each Neighbourhood Partnership, which equates to £500 or £750 per ward.

Proposals for environmental projects can be submitted through Neighbourhood Forums, Neighbourhood Partnership meetings, local environmental sub groups and community walkabouts. They can also be submitted direct to the Council and local Councillors.

All proposals will be collated by your Area Environment Officer, and ward Councillors will make decisions on what proposals get funded.

Your Area Environment Officer can advise on the cost, practicality and eligibility of your proposal. They can be contacted by email at Neighbourhood.Engagement@bristol.gov.uk and by phone on 0117 922 1947.

Examples of works/projects which have been funded previously are:

- Planting schemes – trees, bulbs or shrubs;
- Replacement of street or park litter bins or benches;
- Restoration work – painting of railings for example;
- Clearance of fly tip and litter;
- Graffiti removal
- Cutting back of overgrown vegetation;
- Hanging baskets in streets and public places;
- Community clean-up events and campaigns.
- Purchase of tools and equipment for communities to use such as litter pickers and graffiti removal kits.

Process for Neighbourhood Partnerships for allocation of Clean and Green citywide budget of £19,000

2012

General rules

- Neighbourhood Partnerships can apply for additional Clean and Green funding from a £19,000 funding pot to deliver environmental improvements in Neighbourhood Partnership areas. This is in addition to the £1,500 of Clean and Green funding already devolved to Neighbourhood Partnerships.
- All Partnerships are eligible to apply; however preference will be given to applications from areas of the city that are priorities for cleanliness projects.
- Local people or communities should have identified the need for the environmental project.
- The money should ideally deliver work that is over and above that provided by the Council's contracted services.
- Ideas for environmental works / projects can be submitted through Neighbourhood Forums, Neighbourhood Partnership meetings, local environmental sub groups and community walkabouts. They can also be submitted direct to the Council and local Councillors.
- The Clean and Green Board will make the final decision on what gets funded having taken into account the funding criteria.

Specific criteria

- The Clean and Green Board would like to fund as many proposals as possible. This means that bids for smaller amounts of money are preferable as are proposals that are already part-funded. However this is not an absolute requirement.
- Preference will be given to applications for projects that take place in one of the six priority wards for cleanliness projects as determined by the Council's annual Quality of Life survey. These are Lawrence Hill, Easton, Avonmouth, Filwood, Hillfields and Lockleaze.

Process for applying for additional Clean and Green funding

1. Your Area Environment Officer can provide advice on costs, the practicalities and the eligibility of proposals. Contact by email at Neighbourhood.Engagement@bristol.gov.uk or Tel 0117 922 1947.
2. The decision to apply for funding will be made by the Neighbourhood Committee. The Area Environment Officer will refer all proposals or ideas received from the community to the Neighbourhood Committee.

3. The Committee might choose to delegate its authority to a sub-group or similar.
4. An application form needs to be completed. Refer to following page.
5. Applications need to be received by 4 pm on 17th August 2012.
6. Applications for funding will be considered by the Clean and Green Board in September 2012. At the Board meeting the funding available will be £19,000.
7. All applicants will be informed immediately following the Board's decision.

For further information contact the Neighbourhood Engagement Team at Neighbourhood.Engagement@bristol.gov.uk or Tel 0117 922 1947.

Greater Fishponds Neighbourhood Partnership

21st June 2012

Neighbourhood Partnership Update

May Gurney is proud to have been the successful bidder for Bristol City Council's Waste Collection, Recycling and Street Cleansing Contract. The new contract brings new challenges and changes to the waste, recycling and street cleansing services.

We aim to reduce the volume of waste going to landfill by increasing the quantity of recyclate we collect. We will do this by increasing the range of materials you can recycle. We will collect all your materials for recycling from your property and sort it at the kerbside into our fleet of purposefully designed vehicles. All the materials we collect will then be sent onto our partner reprocessor companies based in the UK.

We are committed to providing a service and providing information at a Neighbourhood Partnership level; supporting the Council's principle of local communities influencing or deciding on how services are delivered.

To enable this, we will implement a number of initiatives including the following:

1. Community Stewards

Each Neighbourhood Partnership will soon have the support of a named Community Steward, an operational expert who will work with the Council's Area Environment Officers to:

- Provide information about how we are performing against key targets.
- Discuss issues of local priority and help design solutions to problems.
- Interpret for Neighbourhoods the scope for making changes to services.
- Support community-based activities.

All Community Stewards should be in place by the end of June 2012.

Community Stewards and Area Environment Officers will hold local service surgeries because we believe that the best way for you to get your

message across is face-to-face. Local people will be able to drop in to talk to us, without the need for an appointment.

2. Neighbourhood Plan

We are currently developing individual Neighbourhood Partnership Plans to cover the key issues as they are experienced in local communities.

The Neighbourhood Plan sets out our approach to working with Neighbourhood Partnerships, local residents and community-based organisations to ensure that service delivery is aligned, within the constraints of the Contract, to local issues and priorities.

We have started putting together information regarding the services delivered in each Partnership, a programme of events aimed at getting people involved in caring for their local environment, and details of how we are performing in your area against some of our key targets.

Each Neighbourhood Partnership Plan will be able to identify up to three specific targets which we will monitor and provide updates for.

Starting in August, the Council's Area Environment Officer's will schedule in opportunities to inform the first Neighbourhood Plan and to determine how local service surgeries will work.

The Council will ask each Neighbourhood Committee to agree and adopt its Neighbourhood Plan from November this year.

3. Neighbourhood Performance Dashboard

To provide each Partnership with regular information about how we are performing, we will prepare on a quarterly basis a Neighbourhood Performance Dashboard. Each dashboard will include information on the following:

- **Tier 1 Targets** that will report our performance against Contract Targets at the City-wide level.
- **Tier 2 Targets** that will report our performance against the same performance criteria in each neighbourhood separately
- **Tier 3 Targets** that report our performance on a selected number of local targets that are specific to each Neighbourhood Partnership only.
- **Hot Spot Maps** that will show the number of incidents relating to acts of environmental vandalism in each Neighbourhood.

4. Satisfaction surveys

Your Neighbourhood Partnership will be asked each year to tell us and the Council how happy you are with May Gurney's services.

5. CleanBristolStreets

We know our job is to collect your waste, clean your streets, remove fly-tips and graffiti and help make your local community a more welcoming place for you to live. However, we also know we need your help. That is why we are introducing our CleanBristolStreets campaign.

The main focus of the campaign is to remind everyone that we all have a duty to act responsibly by not: dropping litter, discarding cigarette litter on pavements, putting out rubbish on days when no collections are due, fly-tipping and damaging buildings and street furniture with graffiti.

6. Clean up your Neighbourhood

To complement initiatives such as CleanBristolStreets we will work with Neighbourhood Partnerships to support a range of activities under the broad umbrella of Community Clean Ups. Typically, these involve local organisations and community-based groups taking direct action to maintain important community spaces and to tackle local 'eyesores'.

The Council's Area Environment Officer's will both initiate and facilitate requests for community clean-ups.

7. Through the Keyhole

We will be introducing our innovative Through the Keyhole programme to help representatives from the Neighbourhood Partnerships develop a deeper understanding of how we organise our services and to build a stronger relationship between Partnerships and May Gurney.

Next steps

Your Area Environment Officer will be able to provide updates on the progress of May Gurney's initiatives to work at a Neighbourhood level and will provide a more detailed report at the next Partnership meeting in September.

If you have any questions on the information provided here contact your Area Environment Officer at Neighbourhood.Engagement@bristol.gov.uk or call 0117 922 1947.

You can contact May Gurney directly on mgbristol@maygurney.co.uk or alternatively you can write to us at May Gurney, Albert Road, St Phillips, Bristol. BS2 0XS.

Greater Fishponds Neighbourhood Partnership21st June 2012**Title:** Community Tree Planting Programme**Officer Presenting Report:** Denise James, Area Environment Officer**Contact Telephone Number:** 0117 9222476**Recommendation:**

The Partnership is asked to either:

1. Approve a tree planting plan for **Begbrook Green Park** or
2. Propose alternatives that officers can consider against the relevant criteria.

The Partnership is further asked to:

3. Advise of those that would like to be involved in drawing up the tree planting scheme.
4. Confirm whether TreeBristol can deliver a Community Tree Planting Event on the nominated site between November 2012 and March 2013.
5. Offer suggestions for locations for additional tree planting in the Neighbourhood Partnership area.

What is TreeBristol?

TreeBristol is the city council's tree planting campaign. We planted over 1,000 specimen trees across the city last year and aim to plant a similar number this year. We have a budget but welcome contributions from local community groups and businesses, which would allow us to plant even more trees.

We are contacting each Neighbourhood Partnership to ask for:

1. Approval to develop a tree planting plan for one park in each area
2. Approval to organise one community tree planting event in each area
3. Suggestions for tree planting throughout each area

Tree Planting Plans 2012-2013

We select sites for tree planting schemes using the following criteria:

- scope for extensive tree planting of 10+ trees
- community interest
- a need to manage the removal and replacement of trees

and we ensure any new tree planting suits the historical or landscape context of the park.

We are proposing a single site this year to give us sufficient time to produce the planting plans and organise the community tree planting events.

For your Neighbourhood Partnership area we would like to propose **Begbrook Green Park**.

We suggest this site because there is a need for a coherent tree replacement programme that suits the character of the site. This is an opportunity to introduce extensive tree planting around the perimeter and along pathways with new tree species for greater seasonal interest.

Please note: In future years we will continue to select sites for new tree planting in your area. We also welcome suggestions from you for sites that meet the above criteria for us to develop.

Community Tree Planting Event

Begbrook Green Park is suitable for a community tree planting event. TreeBristol can organise this on your behalf, inviting members of the community, schools and corporate volunteers to come and plant the trees. TreeBristol events are great fun, very rewarding and everyone is welcome.

Additional Tree Planting this Winter 2012-2013

Besides the site selected for a tree planting plan and event we welcome applications for additional smaller scale tree planting projects. Applications will be assessed year round on a project by project basis. To be eligible for planting this winter (November 2012 to March 2013), applications must be submitted to TreeBristol by the end of September 2012.

To request a TreeBristol Community Tree Planting application form or if you have any questions contact:

- Your Area Environment Officer **Denise James** at denise.james@bristol.gov.uk 0117 922 1947;
- **Josie Sadler**, TreeBristol Officer at josie.sadler@bristol.gov.uk or 0117 3525638, or visit www.treebristol.com
