The above reflects levels of crime reported to Police across the entire Bristol South Local Policing area. We have seen a small decrease in dwelling burglary, but would note that this equates to 5 fewer offences over the five months YTD. There has been a significant increase in the recording of offences as racially or religiously

aggravated, partly due to better confidence in reporting issues but also attributable to some concerning cases whereby victims have been targeted on numerous occasions. The other figure worthy of note is the continuing rise in incidents of violence against the person offences, up almost 54% across the Bristol South area.

The second table details the number of “incidents” recorded by Police. It is important to bear in mind that several people might report the same incident, but each report would be counted in the above list. However, as a comparison year on year, it does now seem to show a reduction in reports of anti-social behaviour (ASB). As before, I would caution against reading too much into this though, because it might simply be down to better recording of incidents as crimes (particularly violence against the person) rather than ASB.

Individual figures for the neighbourhood partnership area, and per ward are shown on the pages that follow;

Overall numbers of crime across the partnership area remain very low, so small changes in numbers can have a greater impact in terms of percentages.
