Following a short adjournment, it was then moved by the Lord Mayor that standing order CPR2.1(xi) be suspended to allow the meeting to go past the 30 minutes time limit for motions. Following a vote it was agreed to proceed up until a 45 minute limit for motions and a 9pm finish time for the meeting.

Golden Motion: PROTECT THE GREEN BELT AND BRISTOL'S GREEN SPACES

Councillor Eddy moved the following motion:

This Council welcomes the importance placed by Her Majesty's Government on the protection of the Green Belt and endorses the main reasons given for preserving this strategic space.

These zones are essential to check urban sprawl; prevent the merging of neighbouring towns; safeguard the countryside from encroachment; preserve the setting and special characteristics of historic areas; and assist in urban regeneration by encouraging the recycling of already developed land.

The need to conserve the existing Green Belt, as well as retaining vital green spaces, remains a major priority for most people in our city. As a result, Council notes the Mayor's recent decision to not now build housing on Brislington Meadows and to 'look again' at housing plans which would destroy the Western Slopes wildlife corridor.

Sadly, there are other equally significant sites which remain under the threat of the bulldozer. One such place is Yew Tree Farm, Bristol's last working farm. The family there has been recognised by the Avon Wildlife Trust and RSPB for the huge strides made in achieving sustainable, low-intensity, organic local food production, whilst maintaining abundant and attractive biodiversity.

Considering the Mayor's pledges around combatting food poverty and encouraging communities to grow more of their own food, Council calls for a halt to the proposed redevelopment of or incursion into any remaining productive wildlife rich agricultural land.

Furthermore, the Mayor is asked to give a cast-iron commitment that he will look instead to increase the emphasis placed in the Authority's Site Allocations and Development Management policies on re-using or re-purposing existing and emerging 'brownfield', previously developed or urban centres rather than continuing to erode our surrounding fields and countryside.

The motion was seconded by Councillor Hucker.

Councillor Renhard then moved the following amendment:

'That the motion be amended to read as follows:

This Council welcomes the importance placed by Her Majesty's Government on the protection of the Green Belt and endorses the main reasons given for preserving this strategic space.

previously developed or urban centres rather than continuing to erode our surrounding fields and countryside.

This Council also notes the inclusion of the Government's Planning Bill in the 2021 Queen's Speech, the content of which runs contrary to the views expressed in this motion. Full Council believes this Planning Bill, that would abolish Section 106, fetter Development Control committees and lead to a free-for-all for housing developers, is an affront to local democracy as it could see developers build on green space with no public consultation or democratic oversight. This Council therefore calls on Party Group Leaders to write to the Government to make it clear of its view that this bill should not become law.

The amendment was seconded by Councillor Cole.

Following debate, upon being put to the vote, the amendment was LOST.

The Lord Mayor then invited Councillor Eddy, as mover of the original motion to speak.

Councillor Plowden then moved the following amendment:

This Council welcomes the importance placed by Her Majesty's Government on the protection of the Green Belt and endorses the main reasons given for preserving this strategic space.

These zones are essential to check urban sprawl; prevent the merging of neighbouring towns; safeguard the countryside from encroachment; preserve the setting and special characteristics of historic areas; and assist in urban regeneration by encouraging the recycling of already developed land.

Council also welcomes the Mayor's pledges around combatting food poverty and encouraging communities to grow more of their own food.

Council notes that much of the land we may think of as Green Belt is in fact designated as Sites of Nature Conservation interest (SNCIs) and wildlife corridors, and that whilst this land has some protection granted under local planning regulation, policy may override these protections.

Full Council resolves:

1. To call for a halt to the proposed redevelopment of or incursion into any remaining productive wildlife rich agricultural land.
2. To ask the Mayor to give a cast-iron commitment that he will look instead to increase the emphasis placed in the Authority's Site Allocations and Development Management policies on re-using or re-purposing existing and emerging 'brownfield', previously developed or urban centres where not also needed as space for nature rather than continuing to erode our surrounding fields and countryside.
3. In the forthcoming update of the site allocations policies, to make every effort to avoid designating any SNCIs for development.
4. To create policy to prioritise the preservation of the integrity of any wildlife corridors contained within sites designated for development.
5. To work with adjacent local authorities and WECA to reinforce our policies on preserving Green Belt, and to work with these bodies to preserve our cherished countryside.
6. To assign or instruct officers to consider adopting the Western Slopes and Brislington Meadows as Local Green Space as provided for within NPPF guidance, providing similar planning protection as for the Green Belt.
7. Furthermore, to work with local communities across Bristol to similarly make every effort to designate much loved green space in other parts of the city and noting that such protection for green space was proposed as part of the recent Bristol Local Plan Review.

The amendment was seconded by Councillor Hance.

Following debate, upon being put to the vote, the amendment was CARRIED.

(41 For, 0 against, 22 abstentions)

Mayor Rees was invited to speak on the debate.

The Lord Mayor then moved to vote on the motion as amended.

Upon being put to the vote, the motion as amended was CARRIED.

Silver Motion - Achieve Zero Carbon Development

Councillor Stone moved the following motion:

Full Council notes that:

1. Bristol City Council declared a Climate Emergency in November 2018 following a Green Motion set out by Carla Denyer.
2. The motion committed the city to achieve net zero carbon by 2030 and there are now only 9 years left to this target date.
3. The Council is currently required to implement the Government approved uplift to Part L (power and energy standards) and F (ventilation standards), of the new building regulations due to be published in December 2021 for implementation from June 2022
4. Responses to the Government's 2020 consultation on the Future Homes Standards made it clear that the Part L uplift proposed for December 2021 was insufficient to meet the government's zero carbon target for 2050, and called for higher standards.
5. The Council has the capacity and authority to set local energy efficiency standards for new homes as set out in the Planning and Energy Act 2008, and may set them at a higher level than government standards. Local Planning Authorities must do this through their development plan documents, following consultation and examination by planning inspector.
6. The Council's Local Plan is currently under review and often goes above-and-beyond the proposed 2021 building regulations. The Council also notes that the draft 2019 Local Plan would encourage all new developments to be zero carbon and this aim was reiterated in Progressing Bristol's Development – a Bristol City Council statement on planning in Bristol.

Full Council believes:

1. Only implementing the minimum uplift values for Part L (see appendix A) in Dec 2021 for new homes would require further costly retrofitting in the future in order for homes to meet our 2030 carbon targets.

2. Implementing the principles of the proposed building regulation requirements for Part L discussed in the Futures Homes Standards 2025, in December 2021, would contribute to Bristol reaching our zero carbon targets by 2030.

3. The Council's revised Local Plan should seek to require rather than simply 'encourage' zero carbon development of all types of buildings.

4. It will be necessary to set out a strategic plan and use the powers in the revised Local Plan to ensure that all buildings which receive planning consent from 2024 are to be built to a 100% zero carbon standard.

Full Council Resolves:

1. To call on the administration to implement the powers of the Council with respect to the Planning and Energy Act 2008 and apply zero carbon Standards at the earliest possible opportunity through revision of the Local Plan.

2. That the administration promote all new buildings to be built zero carbon from 2025, and that a strategic plan is established in partnership with the homes board and in consultation with the building development industry to enable some Bristol City Council and private projects to achieve this standard earlier

Councillor Pearce seconded the motion.

Following debate, upon being put to the vote, the motion was CARRIED (61 For, 0 against, 0 abstention) it was RESOLVED:
