

Annex A: Planning Performance KPIs & core de-designation justification

**for 30 July Economy & Skills Committee 2024
30-09-24 updated version**

Delivered as Planned

Capacity:

- Vacancies filled but turn over of staff continued, so net capacity gain less and slower than had anticipated in November.
- Over-time scheme & freed up officers (improved comms, structure...)
- Secured & fully utilised super-squad and Planning Skills Development Fund

Substantially increased productivity including by:

- Started improved service for new applications on 06/12/2023
- Expanded template utilisation, shorter reports, speedier consultee responses & started case officer is 'sovereign' approach
- Regular 'backlog days' & clearing old cases (taking the hit in stats)
- Pivoted to EoT focus following designation

Growth & Regeneration

Improving customer experience

Introduced 'feedback link' on decision notice from 01/07/24: 25 responses to 29/09

Setting aside whether you received the outcome you wished, how satisfied were you with the delivery of service you received?

Average rating: 3.6

Growth & Regeneration

Comments received include:

The last 12 months+ have been terrible for anyone that has had to wait for planning permission from the BCC planning department to progress with their build or development. Businesses have suffered and clients have been vastly affected by the incompetence and delays of the planning department, a very sad state of affairs.

Being able to work with a organisation that is positive and proactive is pleasing. This approach gave me satisfaction and we both accomplished what we set out to achieve. Regards

Timely response that enables us to proceed with work whilst weather is favourable

Delays at my end and requests for extensions were always handled courteously and professionally, with it being clearly set out what had been agreed in each case.

Positive interaction with Planning Office in terms of checking progress of application and meeting original determination deadline.

Planned for remainder of year

- Continue with all applications allocated within days of validation and predictably progressing to determination to agreed timetable;
- Tighten approach to negotiations: without pre-app unlikely to give extensions of time. Expand & consistently apply 'time-budget' approach (ie resource proportionate to fee-envelope only);
- Introduce and expand usage of external templates & continuously improve website as resource for driving good applications;
- Expand learning from appeals and including sharing key lessons externally to discourage 'chancing applications';
- Complete switch over to permanent resource
- Continue digital and process improvements.

Proposed list of measures for de-designation

- consistently meeting statutory performance targets for at least 1 quarter
- From 1 July allocating applications within 2 weeks of validation
- From 1 September allocating applications within 1 week of validation
- Maintain good progress towards achieving 'total work in hand' between 500-700 applications; aim to achieve & maintain this from Q4 of 24/25
- From 1 July issue customer feedback request with every decision, looking to achieve at least 60% customer satisfaction (to then continuously improve)
- Continuously improve time taken for decisions and establish consistency (officers to identify realistic measures following further analysis)
- Maintain productivity at sustainable & realistic level (confirm level following analysis)
- Website and local list updated
- Pre-apps being delivered to timeframes agreed with developers
