

Preferred Tree sites for bids for 14 Replacement Trees for Stoke Bishop and Westbury Wards (formerly NP3)

	<u>House No</u>	<u>Road</u>	<u>Site Number</u>	<u>Reason</u>
1	131	Abbey Road W	100005.5	Road was a tree'd road and has gradually become de-nuded. This road is busy and crowded and will get worse once the A4018 is as busy as we anticipate. These 2 complement an s106 planting.
2	109/111	Abbey Road	10007.5	
3	9	Great Brockeridge	100005.5	Road is partially tree'd. More trees would have visual impact
4	Side of 33 Horseshoe Drive	Sabrina Way	100001.5	Sabrina Way is experiencing its tree wipe out now. The Portway is busy. A replacement tree here will help in terms of pollution, noise reduction and visual amenity
5	4, Wycliffe Road	Henleaze Road Dual carriageway	100013.5	To complete a scheme started by the NP which was to compensate for the loss of trees in Quarry Park. This is a busy road near a children's playground and pollution is a concern.
6		Southcroft	100003	A more bleak area of Henleaze. There is one tree at this junction (and a boat!). Another tree nearby would make quite an impact.
7	6 Hill View	Henleaze Park Drive	100007.5	This ridge through Henleaze is a bit bleak and windy. Hill View is an important and busy road with traffic increasing as it avoids Henleaze Road. Visual amenity would be enhanced and pollution more greatly alleviated with more trees along this stretch of road.
8	30	Hill View	100015.5	
9	29/31	Hill View	100013.5	
10	4/5/6	Woodleaze	100012.5	Close to the Portway and its traffic and to "complete a tree'd road where there is one missing.
11	65	Roman Way	14.5 (note change of site number from previous submission.)	Roman Way suffered a wipe out due to diseased old trees all needing felling at the same time (like Northumbria Drive). The residents rallied and paid for many new trees. This one would complete the restoration. It is near the traffic laden Portway and is a popular traffic route from and to the Portway.
12	71/73	Bell Barn Road	100011.5	This road should be an avenue. It has wide grass verges some of which have a tree when they should all have a tree. Two trees here would be improve visual amenity. It is a busy road and will be a rat-run to alleviate the anticipated congestion on the A4018.
13	Between 76 & 66	Bell Barn Road	100008.5	
14	20/22	Sabrina Way	1000012.5	Sabrina Way is experiencing its tree wipe out now. The cherry tree that grew here was much loved. The Portway is busy. A replacement tree here will help in terms of pollution, noise reduction and visual amenity.
