

Bristol Health and Wellbeing Board

Title of Report:	Draft Bristol Children & Young People's Emotional Health & Wellbeing Locality Transformation Plan 2019/20
Author (including organisation):	Carol Slater, Head of Transformation, Mental Health Bristol, North Somerset & South Gloucestershire Clinical Commissioning Group
Date of Board meeting:	27 November 2019
Purpose:	Information and discussion

1. Executive Summary

In summer 2015, the Departments of Health and Education published a joint five year 'Future in Mind' strategy to transform services for children and young people's emotional health and wellbeing. In response, we publish a comprehensive local transformation plan for Bristol which is refreshed each year.

This 2019/20 refresh reviews service developments of the last year, and outlines plans and priorities for the future. This plan is developed in collaboration between the Local Authority (Public Health and Children's commissioning), children, young people and their families, voluntary sector partners, commissioned service providers and the Bristol, North Somerset & South Gloucestershire Clinical Commissioning Group (BNSSG CCG).

This plan outlines the joint priorities and actions of all local partners within Bristol and is coherent with the ambitions of Thrive Bristol and the draft BNSSG Mental Health and Well Being strategy, with regards to Children and Young People.

2. Purpose of the Paper

The purpose of this paper is to present the refreshed draft of the Bristol Children and Young People's Emotional Health and Wellbeing Locality Transformation Plan for 2019/20 to the Bristol Health and Wellbeing Board, to gain insights and seek views on the strategic fit with national and local policy, the achievements to date, and the priorities and planning beyond 2020.

3. Evidence Base

The case for prevention and early intervention in relation to children's mental health is well documented. Nationally, 12.8%, (1 in 8) of children aged 5 – 19 and 5.5% of children aged 2-4 has a diagnosable mental health problem (NHS Digital). In Bristol as a whole just over 19,700 children - 24% of all children – live in income deprived households, however on a ward basis, almost half of all children live in income deprived households in Lawrence Hill ward, Filwood ward, Whitchurch Park ward and Hartcliffe ward.

The Mayor of Bristol, Marvin Rees, has continued to make the emotional wellbeing of children and young people a priority. It is one of four priorities in Bristol's Strategy for Children, Young People and Families 2016–2020. Bristol's vision for 2015-2020 remains to ensure that every child everywhere receives the right support as early as possible.

4. Recommendations

This 2019/20 refresh sets out the significant progress achieved through partnership working across health, council services and the voluntary sector over the last year.

The Health & Wellbeing Board is asked to consider the draft plan. Their views are sought on the strategic fit with national and local policy, the achievements to date, and the priorities and planning beyond 2020, in advance of the final document being completed and published on the CCG website.

5. City Benefits

The One City Plan includes the ambition that by 2050:

- **Everyone** in Bristol will have the opportunity to live a life in which they are **mentally and physically healthy**
- **Children** will grow up free of adverse childhood experiences having had the **best start in life** and support through their life.

The Bristol Children and Young People's Emotional Health and Wellbeing Local Transformation Plan supports delivery of these ambitions by focusing on prevention and the role that partners from across the city can play in promoting good health.

An all age Mental Health and Well Being Strategy is being developed with partners to underpin all aspects of mental health and wellbeing within Bristol, North Somerset and South Gloucestershire. The draft strategy interweaves the key principles of the One City programme and Bristol Thrive and re-inforces the need to reduce inequalities.

In 2018/19, there was an increased focus on transforming models of care and BNSSG Clinical Commissioning Group increased funding into CAMHs services by £750,000. This additional funding has contributed to Bristol and South Gloucestershire Children Adolescent Mental Health (CAMHs) service remodelling throughout 2019/20, to adopt the 'Anna Freud' inspired i-Thrive model of care with delivery focused on need rather than by the traditional tiered approach to care. The new service will include the voluntary sector, advice and guidance and health and social care for lower level need.

6. Financial and Legal Implications

There are no financial or resource implications currently identified in the plan.

7. Appendices

Draft Bristol Children & Young People's Emotional Health & Wellbeing Locality Transformation Plan 2019/20.
