

Statement: CS08.02

Cabinet – 1st September 2020

Re: Agenda item 8 – Clean Air Zone

Statement submitted by: Councillor Don Alexander

I welcome the Council taking more time to look at alternative options for NO2 compliance. Many of my residents are tradespeople who often need to get to the centre for spare parts or tools as well as to work, and a charging zone would unfairly impact on their businesses. The Council's ongoing consideration for their important role in city life is, and will be, much appreciated.
