

Appendix 3. Health and Wellbeing Strategy prioritisation criteria

1. Is there a problem we are trying to solve? (Why are we doing this?)
2. Is there evidence of need and potential impact? (Burden on the health of the local population/health inequalities).
3. What can and will be done differently if this priority is in the Joint Health and Wellbeing Strategy?
4. Is this an issue that partnership working can impact upon?
5. Is the Health and Wellbeing Board the right body/partnership to lead on this? (or is another body already leading on this?)
6. Does this fit well with partners organisational must-do's (or HWB must-do's)?
7. Is it a priority for all partners on the Health and Wellbeing Board? (is this covered above?)
8. Is it feasible to make some demonstrable progress on this in a 2 – 3 year period?
