

Question: CQ17.01

Cabinet – 9 March 2021

Re: Agenda item 17 – Social Value Policy Review

Questions submitted by: Cllr Anthony Negus

Is the mayor satisfied that this late conversion to Social Value and it's widened scope goes far enough in embedding two essential elements:

1. Physical and Mental Health, the latter being particularly affected by choice and involvement with decisions that affect an individual
2. Evaluation of impacts of decisions which currently can only be assessed as monetary equivalents.

If this document is to reflect a new approach why does it not say that we should be, for example, evaluating the community benefit from planting new street trees or the impact on our health services of allowing them to be cut down?
