

Statement: PS17.01

Cabinet – 2 November 2021

Re: Agenda item 17 – Purchase of iPoint Ticket Machines

Statement submitted by: David Redgewell

Whilst this item is to be welcome as funding agreement with metro mayor Dan Norris and the combined transport authority for the Bristol parkway station to Patchway station approach Filton North station for the YTI arena and Cribbs Causeway Patchway new Town and we welcome the realtime information and new bus stops, it's a pity that the I point tickets machine do not sell a complete list of integrated transport tickets for Avonrider Bristol Rider bus rail freedom passes.

No review was undertaken of the Bristol south loop missing route from Whitchurch, Hengrove, Hartcliffe, Withywood, Highridge, Yandley Lane, South Bristol link road, Ashton gate park and ride Bristol Temple meads, Bristol Broadmead and city centre route which need shelters realtime information system and I points for a commission metro bus service by the West of England combined authority metro mayor Dan Norris and North Somerset council. As I points and shelter provision could have been made on the route as well.

We need to complete the metro bus network with additional routes Bristol to Yate and Chipping Sodbury, Bristol to Thornbury, Bristol to Nailsea and Clevedon, Bristol to Keynsham, Brislington, Keynsham, Salford, Salford and Bath, South Bristol to the Portway, Shirehampton Portway Park and Ride and Severn Beach Cabot park at west of England combined authority and North Somerset council joint committees and an update on metro bus plans to the metro mayor Dan Norris and the joint committee.
