

**Question: CQ14.01**

**Cabinet – 8 February 2022**

**Re: Agenda item 14 - Project 1000: Affordable Housing Delivery Plan 2022-2025**

**Question submitted by: Councillor Tim Rippington**

As sites like the Western Slopes have had their housing plans withdrawn due to ecological concerns, the numbers for housing will need to be made up elsewhere, because, as we all know, despite the administration's good work, Bristol still faces a housing crisis – something that comes up regularly in my conversations with residents. Brislington East has industrial land by the river that is currently designated as flood risk.

**If flood defences are secured, does the administration have an estimate of how much brownfield land might be freed up for affordable housing?**
