

## Bristol Health and Wellbeing Board

Title of Paper:	Inner City and East (ICE) Locality Partnership Update - Agenda Item 8 (b)
Author and locality:	Joe Poole
Date of Board meeting:	23/06/2022

- Updates will be published on the [public website](#)
- Board correspondence:
  - Board support officer - [mark.allen@bristol.gov.uk](mailto:mark.allen@bristol.gov.uk)
  - Democratic Services – [jeremy.livitt@bristol.gov.uk](mailto:jeremy.livitt@bristol.gov.uk)

### 1. Highlights in our work since the last meeting

#### a. Community Mental Health

- **Community Inclusion Service** – finalising options for identifying a provider/s through a market engagement exercise to deliver the ICE Locality Partnership Community Inclusion Service aimed at supporting people from our most marginalised communities to access the support they need. The market engagement exercise will help to shape the service. The intention is to employ several link workers representing communities in Inner City and East Bristol who have not been well-served in the past, to improve access to services.
- **Integrated Personalised Care Team (IPCT) prototype**  
*The IPCTs in Inner City and East Bristol will provide personalised, proactive and preventive care with an emphasis on the social or non-medical model of health. This model is characterised by understanding the individual in relation to a broad range of factors and determinants of health, not solely on physiological factors, and where shared-decision-making conversations result in a personalised care plan, based on what matters to the individual, and that may include support from multiple agencies and practitioners.*

*This approach is being tested in the east of the city by a multidisciplinary team of professionals including GPs, mental health workers, social prescribers, social care staff and others. The prototype is still progressing with phase one of the testing process. This is looking at the infrastructure that will be needed to deliver the approach (e.g. Who will need to be involved in the IPCT? How will data be shared safely, efficiently and with the consent of participants? Who would benefit most from being discussed by the IPCT?). In addition, the prototype has now moved onto phase two – the “test and adapt” phase - in which practitioners have begun to share their caseloads to think collectively about how they could better support individuals collectively.*

➤ **Eating Disorders pilot**

*Inner City and East Bristol (as well as North & West Bristol) Locality has been chosen to pilot the nationally recognised SWEDA (<https://www.swedauk.org/>) approach to delivering support for people with eating disorders, through 22/23. A worker to lead on the delivery of the pilot in ICE has been identified and started work in Bristol inner city on 13<sup>th</sup> June. They will work from identified bases in Easton and Central Bristol.*

**b. Ageing Well**

*A GP clinical lead has been identified to support the establishment of an Ageing Well Subgroup of the Locality Partnership which will identify local needs and support the development of co-produced interventions to meet those needs, as well as respond to the requirements of the national Ageing Well programme*

*A planning meeting has been arranged for late June to identify group membership and approach.*

**c. Partnership Board Development**

*The Partnership Board is looking to reconstitute its membership to be more reflective of the Inner-City Bristol population and the values we have adopted in the locality around adopting a personalised, social model of health that focusses on co-designing support offers with people who will use and deliver them.*

## **2. A challenge in our work since the last meeting**

**a. CCG/ICB Transition**

*The abolition of the Bristol, North Somerset, and South Gloucestershire (BNSSG) Clinical Commissioning Group, to be replaced by the BNSSG Integrated Care Board from 1<sup>st</sup> July, has resulted in delayed identification of future structure and resources to support the Locality Partnerships, resulting in some slippage in expected delivery milestones.*

An 'ask' of the Health and Wellbeing Board / One City Partnership in relation to this challenge:

*The ICE Locality Partnership asks the Health and Wellbeing Board / One City Partnership to continue to offer support to the delivery of its various work areas and its overall organisational development.*

### 3. Links to current One City priorities

2022 priorities include the Drug and Alcohol Strategy, Carers Strategy, Belonging Strategy, cost-of-living-crisis, inclusive recruitment, active travel.

*The ICE Locality Partnership has prioritised building a workforce that better represents the people we serve. This has led to the recent identification of a provider to deliver a co-produced Voluntary, Community and Social Enterprise (VCSE) Development Partner to provide some of ICE's smaller community and black-led organisations to develop their capacity to deliver a wider offer to our populations.*

*In addition, we expect that the Community Inclusion Service outlined above will employ workers embedded in and supporting some of our most marginalised communities (e.g. African-Caribbean, Somali, LGBTQ+, Eastern European, South Asian). This approach to inclusive recruitment and diversifying the Locality Partnership will be a continuing thread in our future work.*

An 'offer' to the Health and Wellbeing Board / One City Partnership in relation to this work:

*Locality Partnership is currently working with colleagues from the Health and Wellbeing Board / One City Partnership to achieve this goal as part of the Locality Partnership and would be happy to share any learning from our approach.*
