

**PP01**

Thank you for bringing your petition to Full Council on 5 July.

I appreciate the concerns you have raised with regards to the impact on road traffic on your street.

I understand that a bid with suggested measures to mitigate the impact of through traffic has been submitted to the Local Area Committee. Transport officers have been consulting with local councillors to discuss possible options for restricting HGV access and traffic calming measures. Should the Area Committee choose this as a priority project, then officers will work with councillors in order to pull together a full stage 2 submission.

I would encourage you to continue to work with your local ward councillors to take this project forward. They are best-placed to work with you and officers to progress interventions that maintain access to essential vehicles (such as emergency services and deliveries to local homes), while tackling the issues you have raised.

On the issue of speeding, Enforcement of speed limits is the responsibility of Avon and Somerset Police. Instances of speeding you or residents witness can be reported through their [website](#).

### **Petition Debate – Residents Against the Mast in Redcatch Park**

Thank you for bringing your petition to Full Council on 5 July, and for the speeches you gave in support of the cause at the meeting.

As I said at the meeting, I shared your concerns about the use of emergency powers to enable telecoms companies to put up a temporary mast in the middle of Redcatch Park.

That is why I am delighted that the hard work of all those who have campaigned against this has paid off as we were informed last week that the operators had withdrawn their claim at the Lands Tribunal.

I welcome this decision. We will work constructively with the operators to find a suitable alternative site in accordance with local and national planning policy.

Thank you again to Residents Against the Mast for all your campaigning on this issue.
