

Bristol Health and Wellbeing Board

Title of Paper:	Joint Strategic Needs Assessment Annual Report and Locality Partnership Health Profiles
Author (including organisation):	Tracy Mathews (Bristol City Council)
Date of Board meeting:	7th September 2022
Purpose:	Report for information and agreement

- Paper to be no more than two pages long; full reports or more information can be added as appendices
- Draft papers are reviewed by the Public Health team
- Final papers will be published on the [public website](#)
- Board correspondence: HWB@bristol.gov.uk

1. Executive Summary

This paper is a summary of the health and wellbeing needs of the residents of Bristol, drawn from the JSNA data profile sections updated during 2021/22 and aligned to the Health and Wellbeing Board priorities. In addition, Locality Partnership Health profiles have been developed which use selected performance indicators to provide more detailed intelligence on the contrasting needs of our population.

2. Purpose of the Paper

Local authorities and Clinical Commissioning Groups (now ICB's) have equal and joint duties to prepare a Joint Strategic Needs Assessment (JSNA), through the Health and Wellbeing Board (HWB) in order that the health and social care needs of the population are understood and proper plans and services may be put in place.

The HWB delegates this function to the Director of Public Health for Bristol. Public Health chair the JSNA Steering Group.

This report provides a summary of the findings from all the JSNA work carried out throughout the past year.

3. Background, evidence base, and what needs to happen

The Joint Strategic Needs Assessment is used to:

- provide a comprehensive picture of the health and wellbeing needs of Bristol (now and in the future)
- inform decisions about how we design, commission and deliver services, and also about how the urban environment is planned and managed
- improve and protect health and wellbeing outcomes across the city while reducing health inequalities
- provide partner organisations with information on the changing health and wellbeing needs of Bristol, at a local level, to support better service delivery
- be the evidence base for the [Joint Health and Wellbeing Strategy](#), identifying important health and wellbeing issues for Bristol, and supporting the development of action plans for the 10 priorities named in the strategy

The profile is broken down into 10 themes and currently reports on 85 different subject areas. These sections are kept up-to-date and published as soon after the release of new data as possible.

4. Community/stakeholder engagement

JSNA sections are updated using national and local data (including Quality of Life Survey data) in conjunction with specialist knowledge both internally to Bristol City Council and externally. Locality Partnership Health Profiles were developed earlier this year in consultation with partners, with all three Bristol localities involved in selecting relevant indicators.

5. Recommendations

The Board is asked to:

- Approve the JSNA Health and Wellbeing Summary 2021/22
- Share the Locality Partnership Health Profiles with all partner organisations

6. City Benefits

As stated in section 3 above the JSNA is used to improve and protect health and wellbeing outcomes across the city while reducing health inequalities. The intelligence captured from the JSNA informs commissioning in order to address issues and meet future needs.

7. Financial and Legal Implications

n/a.

8. Appendices

Appendix A: JSNA Health and Wellbeing Annual Summary 2021/2

Appendix B: Locality Partnership Health Profiles:

- North & West Bristol
- Inner City & East Bristol
- South Bristol

Detailed JSNA sections are updated and published on our [JSNA webpages](#)
