

## **Motions received for 18 October Full Council**

### **Golden Motion (Green)**

#### **Setting a realistic housing target for Bristol**

Full Council notes:

1. Bristol City Council will this month begin public consultation on a new Local Plan which will guide development within the city for the next 10 to 20 years.
2. The Local Plan will include local policies which will set locally developed standards for net zero carbon, biodiversity, green space protection, local shopping streets, and so on. Many of these policies are far in advance of national policy in terms of dealing with the climate and ecological emergencies. The local plan will also look at how and where housing will be delivered.
3. Although it is a “Local” Plan it is subject to a “housing need” target that is subject to calculations set by central government.
4. Central government is currently insisting that the largest 20 urban areas, including Bristol, should include a 35% uplift to its housing need target.
5. The result of this is that Bristol has been set a housing need target of 67,000 homes to be delivered within the lifetime of the new Local Plan.
6. This produces an annual target of 4,467 homes per year over the next 15 years, far and above any single delivery year in Bristol’s recent history. It is a figure that has not been approached since the large-scale government investment in council housing of the 1950s. Even more challenging in the current economic climate where people’s inability to afford mortgages is already suppressing the housing market making it less attractive for developers.
7. Government legislation insists that authorities need to demonstrate a rolling five year supply of available land to meet their housing target. If they cannot, private developers will be able to override local plan policies that have been approved by locally elected councillors following public consultation.
8. There are over 16,000 families on the housing waiting list with many of them living in overcrowded and/or otherwise unsuitable accommodation, another 1,000 in expensive temporary accommodation with associated impacts on revenue budgets, whilst both visible and unseen homelessness continues to affect many individuals in our city.

Full council believes:

1. There is a clear need to prioritise the housebuilding efforts of the city to reduce the impact of the shortage of housing for affordable rent, and in particular social rent.
2. It is imperative that Bristol City has a new local plan with modern, relevant policies in order to unlock the highest quality development in the city. The adopting of a Local Plan will have far-reaching consequences for the future of the city at a critical time in our history as we seek to address the climate and ecological emergencies, and at a time of significant economic turmoil.

3. Bristol does not have the delivery capacity nor the land capacity to deliver 67,000 homes in the next 15 years.
4. It is appropriate to adjust the housing need figure to be based on more up-to-date evidence and detailed study rather than a top-down target imposed by central government.
5. The WECA Spatial Development Strategy is unlikely to be completed on a reasonable timescale, and that its absence should not curtail Bristol's efforts to bring a new Local Plan into effect.

Council resolves:

1. To express its full support for the proposal agreed by councillors and officers on the Local Plan Working Group to produce an evidence-led housing target for Bristol's Local Plan that is based on housing need figures for the West of England to be derived by expert consultants.
2. To continue, in the absence of a Spatial Development Strategy, to work collaboratively with our immediate neighbours in North Somerset, South Gloucestershire and B&NES, in order to establish mutually agreed principles for development that recognises the close relationship between all four authorities and the need for cross boundary co-operation to protect biodiversity, address flood risk, and tackle the climate and ecological emergencies as well as addressing locally assessed housing need.
3. To request the Mayor and Party Group Leaders, on behalf of Full Council, to write to central government requesting that they revoke the 35% uplift target as being incompatible with the principles of a locally developed plan designed to meet the needs of Bristol and its residents and approved by its elected representatives.
4. To confirm its support for the 'Project 1000' principles of delivering 1,000 affordable homes per year and that at least 70% of these homes should be for long term affordable rent, and especially social rent, to help address the identified need for truly affordable homes for rent as evidenced by the number of families on the housing waiting list.

**Motion proposed by: Councillor Tony Dyer (Green Group)**

**Motion submitted: 27/10/22**

## Valuing the community sector

This council is facing a considerable financial shortfall and there is general concern that even more valued community services will be closed. In some cases, a much better solution is to encourage the community to take over the service with an asset transfer or to let the community become involved in managing the venture or facility.

Too often the option of community management is considered late in the day after the salami slicing council department has made the task twice as hard.

Cllrs from all parties will no doubt have examples from their own wards of ventures that are working or others that could be given a chance. I have added in notes a list of the ventures within Knowle ward as an example.

Asset transfers give the new owners access to grants that the council could not and are able to tap into enthusiasm and willingness to volunteer. Customers become more flexible and forgiving of small errors.

This Council has the services of a very good specialist officer to deal with asset transfers but there is concern that the back-up is not always as positive as it should be and a short consideration of asset transfers by Communities Scrutiny has led to the need for a second report. This could be done by extending time available to Communities Scrutiny or even better by a scrutiny enquiry day.

In the meantime, some positive factors that should provide encouragement:

1. We should look at the community value and not just a narrow and potentially misleading financial calculation as it affects the council in the short term.
2. we should look at how partners (e.g. police and NHS) can be involved.
3. we should be encouraged if the income is commercial from the public and not purely grants.
4. we must have the option of a responsive licensing facility prior to actual CAT.
5. we should be encouraged if a recognised problem is being tackled that has not been effectively up until now.
6. help in kind in early stages should be considered by the council.

This Council therefore calls for the Administration to show a more positive attitude towards asset transfers and community management and taking into account points 1-6, calls for action to follow a scrutiny enquiry and that a regular review be set up to consider progress and potential new opportunities.

## NOTES

Examples from Knowle Ward:

1. Arnos Vale Cemetery - compulsorily purchased for £1 from "developer" and handed to trust formed by campaigners. Huge grants attracted and successful commercial and community activity. Voted one of the best cemeteries in the country.
2. The Park Daventry Road - old Merrywood school on closure 20+ years ago given to trust that brought together charities investing in training, education and community benefit. Turbo charged by asset transfer and recently completed a new £10M + new community building and a key partner in new secondary school opening shortly on part of the site. A good example of council cooperation.
3. Redcatch community centre - some 20+ years ago a group of local people took over a dilapidated unwanted council building and with grants and local effort turned it into a massively popular, high quality community centre with low hourly charges. All volunteer, no

wages taken by anybody involved. Asset transfer followed and used as an example by officers of a successful CAT in report to scrutiny.

4. Jubilee pool - council failed to run this much-loved community facility efficiently. Despite unfriendly conditions imposed by Mayor and severe challenges of energy costs memberships has doubled and there is a trading profit. Cat completed 30/9/22.
5. Redcatch Community Garden - took over redundant bowling green 5 years ago. Have attracted grants, despite failure of council to extend license efficiently and attract 200,000 visits a year for training, social activity and environmental and horticultural education. Asset transfer finally after much delay getting started.
6. Redcatch Park Pavillion- parks department a few years back aborted investment plans for urgent repairs and said they wanted to asset transfer instead. Partnership formed between community garden and The Park football club who needed extra facilities because of Daventry Rd developments. Parks departmen have failed to progress CAT or even licence and sports changing facilities unusable. In the biggest irony, the football club had previously done exactly the sort of renovation needed and the lowest bidder for the aborted scheme is a local sponsor of the club and stands ready to do the work for them for free. One of the most successful sporting organisations in Bristol with an emphasis on disabled and female teams frozen out.
7. There are many other community organisations, including our parks group, that have transformed Redcatch Park, that do excellent work and what bands the vast majority of them together is a desire to benefit the local community, roll up their sleeves and contribute positively. Being held back by the council is very frustrating.

**Proposed by Councillor Gary Hopkins (Knowle Community Party)**

**Received 20 October**

## **Food sustainability motion**

This Council notes

- Livestock is responsible for 14% of global greenhouse gases.
- Meat consumption has dropped by 17% in the decade leading up to 2019,
- However, the Government's Food strategy for England recommended cutting meat consumption by a further 30% in a decade.
- As well as reducing meat consumption, work to promote local food growing and reducing food waste is needed to make our food system more sustainable.
- The Labour administration in Bristol is already leading the way on this, as is evident in it being awarded Gold Status for Food Sustainability.

This Council believes:

- We can build on this good work by further encouraging people to make more carbon-friendly food choices.
- Gradual steps are needed if we are to encourage people to take up more sustainable diets and blunt instruments like total bans may cause people to simply not use Council / council-procured catering.

This Council resolves to:

- Explore with Council catering services to only offer plant-based options on one day a week – in a system like 'Meat Free Mondays' Through the One City network, encourage schools, universities, and businesses to do the same.
- Encourage any events on Council-landed, or council-funded events, to offer vegan and vegetarian options.
- Reach out to local schools to encourage them to review their cooking courses to include a wider range of sustainable options and promote plant-based cooking.

**Proposed by Councillor Katja Hornchen (Labour Group)**

**Received 26 October**

## Democracy Motion

This Council notes that the Conservative Government's Elections Act replaced the Supplementary Vote system used to elect Metro Mayors and Police and Crime Commissioners with First Past The Post.

First Past the Post (FPTP) originated when land-owning aristocrats dominated parliament and voting was restricted to property-owning men.

In Europe, only the UK and authoritarian Belarus still use archaic single-round FPTP for general elections. Meanwhile, internationally, Proportional Representation (PR) is used to elect parliaments in more than 80 countries. Those countries tend to be more equal, freer, and greener.

PR ensures all votes count, have equal value, and that those seats won match votes cast. Under PR, MPs, Parliaments, and other bodies better reflect the age, gender mix and protected characteristics of local communities and the nation.

MPs (and other representatives) better reflecting their communities leads to improved decision-making, wider participation, and increased levels of ownership of decisions taken.

PR would also end minority rule. In 2019, 43.6% of the vote produced a government with 56.2% of the seats and 100% of the power. PR also prevents 'wrong winner' elections such as occurred in 1951 and February 1974.

PR is already used to elect the parliaments and assemblies of Scotland, Wales, and Northern Ireland. So why not English Local Government or Westminster?

The Elections Act also brought in compulsory photo ID for people wanting to vote, despite the fact that three and a half million people in this country do not have any photo ID, while those forms of ID that are acceptable have been rigged to disadvantage and deter younger voters.

In contrast the Welsh Senedd passed the Local Government and Elections (Wales) Bill on 21 January this year which delivered the following:

- The right of Local Councils to scrap First Past the Post and instead elect Councillors using the Single Transferable Vote
- Votes at 16 - extending the franchise to 16 and 17 year olds and to all foreign citizens legally resident in Wales.
- Automatic Voter Registration - The bill also paves the way for an overhaul of Wales' outdated and ineffective system of voter registration. The bill could lead to a new system where registration officers can identify people missing from the register and let them know they'll be added.

English voters are already disadvantaged compared to voters in Northern Ireland, where STV has been used to elect Councils for decades, Scotland, where the same move was made in 2007, and now Wales is making the same changes.

This Council agrees to join the campaign by the Electoral Reform Society to demand the same rights for English voters that are already enjoyed by voters in Northern Ireland where STV has been used for years, Scotland, where STV came in for Council elections in 2007 and in Wales where Councils will, inevitably, make the move to fair voting.

This Council also commits to working with other Councils, Core Cities, and others to amend and if necessary repeal the Elections Act in order to:

- Reverse the scrapping of the Supplementary Vote system that ensures more votes count in Metro Mayor and PCC elections;
- Demand the list of acceptable photo ID for voters in the Elections Act is amended so younger and poorer voters are not excluded; including fully funding the cost of providing voter ID cards for voters with no other valid forms of ID
- Allow:
  - English Councils to switch to STV if they so chose
  - Votes at 16 for all UK elections
  - Automatic Voter Registration enabling registration officers to identify people missing from the register and let them know they'll be added.

Finally this Council acknowledges that British democracy is broken and calls on all UK political parties to embrace electoral reform for all elections so everyone can vote for the candidates or parties they truly believe in, safe in the knowledge that their vote will always count. Council therefore resolves to write to H.M. Government calling for a change in our outdated electoral laws to enable Proportional Representation to be used for all UK elections.

**Proposed by Councillor Fabian Breckels (Labour Group)**

**Received 26 October**

## **Right-to-buy extension motion**

This Council notes:

- During the Queen's Speech, the former Prime Minister announced the Government intends to extend the right-to-buy scheme to make it applicable to tenants of housing associations.
- There is already a shortage of social housing in the United Kingdom.
- Right-to-buy has depleted Council housing stock, as the homes being sold were not replaced, resulting in a lower levels of social housing.
- 40% of council homes have been transferred to the private rented sector through right-to-buy.
- The UK Housing Review 2022 branding right-to-buy as a 'strategic failure.'
- Unlike the existing right-to-buy scheme, the Government has promised to replace every social home sold off. However, no plan yet exists for how it will do this. Even if a plan is drafted, it is unlikely that social housing stock will be replaced at a rate nearly fast enough to keep up with the number of homes being sold.
- The Government has not yet announced how it will fund the discounts for extending right-to-buy to housing associations.

This Council believes:

- The planned extension of the right-to-buy scheme will deplete Bristol's social housing stock and exacerbate the housing crisis.
- That we should stand shoulder-to-shoulder with housing associations in opposing the extension of right-to-buy.
- Measures to support homeownership should not come at the cost of depleting social housing stock.
- Therefore, there should be no further extension to the right-to-buy scheme. If the Government insists on pushing ahead with the scheme, all funding for it should be covered centrally and increased funding should be given to Councils and registered providers to build more social housing.

This Council Resolves to:

- Call on Party Group Leaders to write to the new Prime Minister, Rishi Sunak, on behalf of all party groups represented within the Council, outlining the views in this motion and to ask them to stop any immediate extension of the right-to-buy scheme.
- Co-ordinate with housing organisations to write an open letter to the Government to ask it to stop the planned expansion of the right-to-buy scheme.
- Instruct Council officers to submit a plan to government of possible ways to boost affordable home ownership rates without depleting social housing stock.

**Proposed by Councillor Tom Renhard (Labour Group)**

**Received 26 October**

## **RE-ESTABLISHING GOOD MEDIA RELATIONS**

“This Council is concerned over the continuing strained relations between the current Labour Administration and numerous local news outlets.

The recent unilateral decision taken by the Authority to change the way corporate information is shared with the media – by growing its own digital platform – represents an unwelcome deterioration or escalation in this breakdown between the press and the Mayor. Moreover, Council is unconvinced by the purported justification for this move, supposedly to ‘reach more people with vital messages’ than might otherwise be achieved through traditional means, methods and mediums.

Council acknowledges that freedom of the press still represents the so-called fourth pillar of democracy. It is a fundamental safeguard which depends upon the right of journalists to question decision-makers in challenging ways. This is how politicians and the powerful are held to account for their words and actions.

In order to mend the rift which has been allowed to develop with Bristol-based news organisations, Council calls on the Mayor to immediately (i) Reinstate access previously accorded to Local Democracy Reporting Service (LDRs) journalists to his fortnightly briefings; (ii) Reach out to the Bristol Post, Bauer Media, the BBC, Bristol 24/7, the Bristol Cable, Bristol World and ITV West with a conciliatory statement to build broken bridges and end the present boycott; and (iii) Ensure that there is no perception that Corporate Communications is being used in a potentially politicised manner.”

**To be moved by Councillor Mark Weston (Conservative Group)**  
**Date of Submission: 27th October 2022**

## **A FAIRER DEAL FOR INVESTING IN BRISTOL'S SUBURBS**

“This Council welcomes the Conservative Government’s ‘Levelling Up’ initiative which seeks to address long-standing economic and social disparities across communities, counties and within cities.

Council further endorses the two schemes for inclusion in the latest round of the Levelling Up Fund (LUF) concerning the commercial regeneration of Filwood (South Bristol) and the bid to build the Bristol Cycling Centre (Bristol North West). Locating a major sporting facility in a part of the city (Avonmouth/Lawrence Weston) will raise the status of a very deprived area and reverses a trend in recent years to divest these places of important public amenities.

However, Council believes that much more needs to be done to invest in the city’s suburban Wards. To this end, Council calls on the Mayor to give a commitment that for the remainder of his term in Office, he will seek to prioritise future national, regional and local funding applications for more projects based in and around the periphery of the city.

Council recognises that real change and the delivery of thriving, local neighbourhoods is dependent upon greater capital investment in our secondary retail centres. Echoing the primary objective of the Levelling Up agenda, if we are to ensure that all Bristolians live healthier, happier lives and are enabled to fulfil their potential, there must be a genuine, more equitable or fairer distribution of resources than has previously been the case under the current Labour Administration.”

**To be moved by Councillor Graham Morris (Conservative Group)**

**Date of Submission: 27th October 2022**

## **PROMOTING BETTER FINANCIAL EDUCATION**

“This Council notes the concern which has been expressed by many professionals and finance institutions over the standard of financial education given under the National Curriculum or through Academy schools.

Critics of the existing system of training have argued that much more comprehensive, ‘bespoke’ and relevant material needs to be given to all age ranges. They maintain that children and young people should be taught more than the basic mathematics involved in understanding different forms of credit and debt.

As citizens of a highly competitive consumer society, with easy access to all kinds of complicated investment and saving instruments, the next generation must also be equipped with the tools or methodologies required to evaluate risk.

Council is aware that various schemes for teaching these essential skills have been run by individuals like the moneysaving expert Martin Lewis and some of the high street banks. However, much more systematic work is required.

Accordingly, the Mayor is asked to liaise with his Director of Education & Skills to establish, examine, and evaluate the current level of financial literacy being taught in state-funded schools. Following such an audit, Headteachers should be consulted on how this provision can be improved and built upon.”

**Motion to be moved by: Councillor John Geater (Conservative Group)**

**Date of Submission: 27th October 2022**

## ENDORSEMENT OF THE PLANT BASED TREATY

Full Council notes that:

1. In November 2018 Full Council declared a Climate Emergency and Bristol committed to becoming carbon neutral and climate resilient by 2030. [1]
2. The sixth Intergovernmental Panel on Climate Change (IPCC) reported in 2021 in its Working Group 1 Assessment Report [2] that it is “virtually certain” that heat waves have become more frequent and more intense since the 1950s, with human-caused warming being “the main driver” and some of the heat extremes seen over the past decade would have been “extremely unlikely to occur” without the climate crisis.
3. The earth's average surface temperature is projected to hit 1.5C above pre-industrial levels around 2030, a decade earlier than the IPCC predicted just three years ago.
4. Between 2014 and 2021 there has been faster growth of atmospheric concentrations of methane. Growth since 2007 is largely driven by emissions from fossil fuels and agriculture, with 32% of methane emissions attributed to animal agriculture.
5. The UN recommends 45% cuts to methane by 2030 [3] in order to limit temperature rises to 1.5 degrees Celsius.
6. Data derived from the IPCC 2014 5th assessment [4] reveals animal agriculture emissions as 35% of energy production, a figure which excludes deforestation emissions attributed to the growing of crops for farmed animals.
7. The Amazon rainforest is now a carbon source rather than a carbon sink as a direct result of deforestation, with around 80% of the deforestation caused by animal agriculture. [5]
8. The 2019 Land Use report by Ritchie, H. and Roser, M. (2019)[6], calculated that 78% of farmland is used to farm animals yet supplies just 18% of global calories and 37% of protein.
9. A global initiative is underway calling for a Plant Based Treaty [7] that through its three Rs, Relinquish, Redirect and Restore aims to halt the accelerating expansion of animal agriculture, incentivise and promote a plant-based food system, rewild critical ecosystems in line with the global commitment to limit warming to 1.5°C, and work to mitigate the climate crisis with fair, equitable transition plans.
10. The Plant Based Treaty has been welcomed by 20 Members of the UK Parliament through EDM 434 [8] which calls on the Government “to be a world leader in recognising the negative impact of industrial animal agriculture on climate change and commit to developing a global strategy to transition towards more sustainable plant-based food systems.”
11. Several local authorities across the UK have already made a commitment to move towards a plant-based future, including Lewisham Borough Council (fully plant-based in all corporate events), Enfield Borough Council (does not serve meat at any meetings or events), Faversham Town Council (fully plant-based at events), Hythe Town Council (fully plant-based at all council functions), Leeds City Council (two meat free days per week in schools), Oxfordshire County Council (fully plant-based in all meetings & events), and Cambridge City Council (fully plant-based at meetings & promoting PB at events).

Full Council believes that:

1. The rapid, strong, and sustained reduction in the three greenhouse gases, namely Carbon Dioxide, Methane and Nitrous Oxide and zero deforestation is a climate imperative.
2. The Paris Climate Agreement is silent on the impact of animal agriculture, one of the largest sources of greenhouse gases, and that needs to be collectively addressed by other means.

Full Council resolves to:

1. Formally endorse the call for a Plant Based Treaty and write to the UK government to call for a global Plant Based Treaty.
2. Help mitigate the climate, ocean, and biodiversity crisis by addressing our food system, including promoting the benefits of locally grown, plant-based foods. For example, encouraging council-run schools to have regular, meat-free days.
3. Lead by example and follow other local authorities in making a commitment to plant-based food at all council meetings and events, where food is served.

**Motion to be moved by: Cllr Varney (Liberal Democrats)**

**Date of submission: 27 10 2022**

## **Bristol Airport Expansion**

Full Council notes:

1. The Planning Inspectorate's decision, at appeal, to allow the expansion of Bristol Airport by 2 million passengers a year, up to 12 million.
2. North Somerset Council refused planning permission for expansion on environmental and traffic congestion grounds and that both local elected representatives and those in neighbouring Councils, as well as the WECA Mayor, objected to the application.
3. That the Full Council of 8 December 2020 passed a motion supporting the decision by North Somerset's Planning Committee's decision to refuse planning permission.
4. The forthcoming High Court challenge by campaign group Bristol Airport Action Network (BAAN), which has been supported by public crowdfunding and which will be heard in Bristol on 8 and 9 November 2022.
5. The Climate Emergency Declaration adopted by Full Council on 13 November 2018.
6. Bristol Airport Ltd.'s published expansion strategy, to more than double in size to serve 20 million passengers a year, and 'Carbon Roadmap' policy, which does not include emissions from aircraft.

Council believes:

1. Airport expansion is incompatible with the action being taken by this Council to tackle the Climate Emergency, the UK Government's legally binding climate targets, and advice from the Government's own Climate Change Committee.

Council therefore:

1. Calls on the Secretary of State for Levelling Up, Housing and Communities to:
  1. 'Call in' the expansion of Bristol Airport for an inquiry, due to the climate impact of airport expansion and the negative impact on neighbouring communities.
  2. Consider all airport expansion applications on a national rather than an individual basis. Make decisions in line with the advice from the Climate Change Committee, which has said there should be 'no net expansion of airports' and also taking the cumulative impact of CO2 emissions and their impact on the UK's legally binding journey to net zero into account.
2. Requests that the Chief Executive write to the Secretary of State, the aviation minister, and local MPs to inform them of Council's position.

**Motion to be moved by: Cllr Brown (Liberal Democrats)**

**Date of submission: 27 10 2022**

## **A Universal Basic Income Trial for Bristol**

This council notes:

1. The drastic impacts of the Covid Pandemic on employment and household incomes in the city;
2. The threat to income and employment from automation and artificial intelligence, which could affect a great many more jobs in future;
3. The development of universal basic income (UBI) trials in other countries, which offer a non-means-tested sum paid by the state to cover the basic cost of living, which is paid to all citizens individually, regardless of employment status, wealth, or marital status, which has been widely debated in recent months;
4. That a trial of UBI was promised by the Labour party had the party won the last general election;
5. The resolutions of other local authorities including Sheffield, Birmingham, Lewes, and Brighton and Hove [with cross party support] calling for trials of UBI;
6. A network of Universal Basic Income Labs has been set up and works with local authorities across the UK developing UBI proposals to address problems such as poverty, inequality, discrimination and environmental damage, long-term and immediately, in relation to coronavirus. One is operating in Bristol.
7. Birmingham City Council has issued a briefing on UBI. (1)
8. UBI has been Green Party Policy since about 1973 and more recently taken up by other parties. (2)

This council believes:

1. That the current benefit system is failing citizens, with Universal Credit causing hardship to many communities;
2. A UBI is the fairest, most effective way to mitigate the effects of coronavirus on people's incomes as it does not discriminate between employment status, caring responsibilities, age, or disability when providing basic support;
3. There is a danger of increasing numbers of people facing poverty as a result of the coronavirus crisis;
4. Testing a UBI is needed, as a UBI has the potential to help address key challenges such as inequality, poverty, precarious employment, loss of community, and breach of planetary boundaries through:
  - i. Giving employers a more flexible workforce whilst giving employees greater freedom to change their jobs;
  - ii. Valuing unpaid work, such as caring for family members and voluntary work;
  - iii. Removing the negative impacts of benefit sanctions and conditionality;
  - iv. Giving people more equal resources within the family, workplace and society;
  - v. Breaking the link between work and consumption, thus helping reduce strain on the environment in line with the One City Climate Strategy;
  - vi. Enabling greater opportunities for people to work in community and cultural activities or to train or reskill in areas that will be needed to transition to a lower-carbon economy.
5. The success of a UBI pilot should not be measured only by impact upon take-up of paid work, but also the impact upon communities and what the people within them do, how they feel, and how they relate to others and the environment around them; and,
6. Given its history of social innovation, wealth of expertise, and active networks across community, business and public services, Bristol is ideally placed to pilot a UBI.

This council calls on the Mayor to:

1. Send a joint letter with the other party leaders to the Secretary of State for Work and Pensions, the Chancellor of the Exchequer, the leader of the party in Government, their counterparts in all opposition political parties in parliament, and all local MPs, asking for a trial of Universal Basic Income in the city citing the above reasons.

**Motion proposer:**

**Ani Stafford-Townsend**

**Central Ward Green Party Councillor**

**Motion submitted: 27 October 2022**

**Sources**

## Ending investment in fossil fuels by Avon Pension Fund

This council notes:

1. In 2015, Full Council supported a Green motion and resolved that the Avon Pension Fund (APF) should consider divestment from fossil fuels and diversification into clean technologies like renewable energy, energy efficiency and energy storage; Council agreed that the Mayor should contact Avon Pension Fund and ask for a report on the issue;
2. There is widespread and heightened concern from scientists that declared worldwide fossil fuel reserves, if exploited, constitute a threat to the stability of the global climate; there is growing recognition that fossil fuel reserves are therefore a class of asset held by investors which have growing risks of being 'stranded' i.e. left with reducing value due to the fact not all claimed reserves now have the value being imputed to them, due to the need for them to remain in the ground;
3. An ever growing number of public and private sector funds, endowments and investment portfolios are choosing to divest from fossil fuels worldwide, including several local government pension funds. MPs called for their own funds to be divested.
4. Clarifications of the fiduciary duty of fund managers confirms that they should take into account a range of environmental, social and governance (ESG) issues and have a clear statement of investment policies;
5. The Avon Pension Fund uses investment provided by the Brunel Pensions Partnership, which is a leading local government pension partnership offering low carbon investment opportunities. This fund is only seeking to meet the 2015 Paris climate targets which are now known to be inadequate to secure climate stability.
6. Staff union Bristol Unison have given their clear support for divestment of the funds from fossil fuels, in a motion seconded by the Branch Secretary and presented to the Avon Pension Fund, as have other Unison branches also in the same fund.
7. Since 2016, the APF has enhanced its environmental, social, and corporate governance (ESG) to recognise and assesses climate change risks, undertake annual carbon footprinting studies, and review low carbon indices and the sustainability of assets; in 2017, the APF increased its allocation towards renewable energy infrastructure; in 2019, Councillor Pearce (who sits on the APF committee for the council) is already arranging a briefing on APF's ESG, divestment, and exposure for members.
8. In 2020 the Bristol Mayor declared the city would seek to promote divestment of the pension fund through signing the international C40 cities' declaration that we are "taking Divest/Invest action for a fairer, fossil-fuel-free green recovery. This commits to:  
"Take all possible steps to divest city assets from fossil fuel companies and increase investments in climate solutions"  
"Call on pension funds to divest from fossil fuel companies and increase financial investments in climate solutions."

This council believes:

1. The long term future of the APF is as a fund that is divested from fossil fuels and one that ensures a wide range of investments in renewable energy, energy efficiency technologies, energy storage and smart energy technologies, and other types of investments that will benefit the city and its future residents;
2. Council recognises that a carbon neutral city will create substantial, valuable new jobs in the future sustainable economy.
3. That the investment strategy and policies of the APF should rapidly be brought into line with this vision of the future inclusive prosperity and sustainability of the city and should not be bound by the 2015 Paris targets;
4. The council should actively call on APF to commit to move funds over the next five years from any holdings that are not seen to be ending fossil fuel exploration, production and processing

5. Bristol's participation in the C40 group of cities, where pension divestment is a headline commitment, mandates the City Council to take a regional lead on this issue;
6. The process of divestment and diversification is also important and should be managed in a way that ensures just transition to new employment, supporting skills development for new sectors and a range of opportunities - with backing from WECA.
7. Now is the time for action; the current strategy of 'engagement' with high emission companies, is not showing to be swift, or effective enough.
8. The council should work with staff to debate and explain the need for funds to support new investments meeting commitments to social and environmental justice, learning from the successful engagement of the Environment Agency Pension Fund, which is also part of the Brunel Pensions Partnership.

This council therefore resolves to:

1. Ask the Mayor and Councillor Pearce to meet with the head of the Avon Pension Fund to discuss the divestment of funds over the next 5 years and the review of the fund's ESG policies;
2. To support the promotion of investment in clean technologies that support renewable energy, energy efficiency, smart energy and energy storage among other investments that are in line with such policies, the City Leap agenda, and the city's goals for 2030;
3. Use its full influence and voice on the Avon Pension Fund committee, and its relationship with the representatives of the other authorities which are the core members of the fund (Bath and North East Somerset Council, South Gloucestershire Council, and North Somerset Council, plus WECA) to advocate urgently for divestment from all fossil fuel stocks in the existing pension fund over a three year period
4. To liaise with fund members in the city and council unions about the case for changes to their pensions while ensuring a just transition for workers in sectors that will change, and how this helps achieve a carbon neutral city by 2030.

**Motion to be moved by: Cllr Martin Fodor, Redland Ward, Green Group**

**Date of Submission: 27/10/2022**

## A citywide ban on digital billboards

This Council notes:

- There is a growing pressure from commercial advertisers for new digital advertising screens across the city alongside highways, on footpaths, and on walls of prominent or vacant sites.
- There is also a switch to digital advertising on phone boxes (advertising is their main source of income - not the phone calls in the age of mobile phones) and bus shelters.
- Despite the revenue provided by Bus Shelter advertising in providing a public amenity in support of sustainable transport, the impact of illuminated and digital adverts on bus shelters is out of place in residential streets.
- Existing billboards may not have planning permission but there has been no consistent approach to removing them via enforcement.
- Many advertising companies are switching to digital billboards which allow them to sell many more advertising slots and increase profits as well as reducing the cost of changing advertising. These digital screens show static but alternating digital adverts which can be updated remotely.
- The law governing display advertising restricts objections to ground of highway safety and amenity only.
- Recent planning appeals have been made in response to rejection of digital advertising on some sites, and with stronger declared policies the planning response could be clearer and some of the initial applications and appeals could be avoided.
- That the Council adopted a new Advertising & Sponsorship Policy in 2021 for advertising sites it controls which restricts ads for High Fat Sugar Salt products, gambling, alcohol and payday loans. (1)
- The high energy consumption of digital billboards adds a growing impact to the city's carbon footprint, (2) The Council's One City Climate Strategy from February 2020 resolved to "[Develop] a citywide shared understanding and commitment to responsible consumption (including lower carbon food and reduced flying), which acknowledges the generally lower impact of lower income households; and [Create] advertising standards and restrictions to support responsible consumption."
- The bright illumination from digital billboards at all hours can also affect local wildlife and local residents, including severe mental health impacts. (3)
- Billboards are subject to objections and controversy every time an application is made, local residents do not want such billboards in their neighbourhoods"
- That many outdoor advertising spaces (both council-controlled and private) contain adverts for high carbon industries such as airlines, airports, SUVs and fossil fuel companies.
- That the French city of Grenoble removed over 326 advertising spaces from its city from 2015 onwards. (4)

This council believes:

- New digital advertising screens are unpopular with Bristol residents as evidenced by the high volume of objections received to planning applications for new digital advertising screens. (5)
- Advertising drives consumption and predominantly represents major consumer goods companies; most adverts are for national and international brands not local businesses so this is limited benefit to the local economy.
- Billboard advertising is a danger to road safety; its purpose is to distract attention. (6)
- Envy and body shame are a phenomenon associated with the prevalence of corporate advertising
- Mental health issues relating to body image are a growing and persistent issue affecting many young people and adults. (7)

- The greatest climate impact in our city is the impact on consumption of goods and services; constant pressure to consume is driven by continuous, pervasive advertising. Extra emissions resulting from advertising products is calculated to have added 186million tonnes of CO2e in 2019 (8)
- When travelling or relaxing outdoors residents have no choice if confronted by digital billboards; the council does not have to enable this negative experience
- There are unequal standards of amenity across the city and some areas have traditionally been better protected than others; the council could set a uniform, high standard of amenity to redress this unequal amenity and ensure fairer standards across the whole city.
- While there are pressures for commercialising council assets the council need not be either a driver of digital advertising through its own walls and structures, nor an enabler through weak policies.

This council therefore calls on the Mayor:

- To introduce a new, high standard of amenity across the whole city, excluding digital billboards and taking enforcement action against unlawful billboard sites.
- To set the highest road safety standards across the city with a declared presumption against distracting digital billboards on the whole road network.
- To end council-initiated billboard sites on walls or other structures.
- To introduce these changes through the local plan and public announcements on property policies.
- To enforce existing restrictions in its Advertising & Sponsorship Policy regarding excludes on ads for junk food, alcohol, payday loans and gambling across council-owned advertising sites.
- To update the Council's Advertising & Sponsorship Policy to include restrictions on highly polluting products including as airlines, airports, fossil fuel companies, SUVs, petrol diesel and hybrid vehicles.
- To work towards Bristol becoming a billboard free city, with space left purely for local noticeboards, signage or public information and creative arts and flags.
- Until that time, commit to ensuring the use of renewable energy in all City Council contracts.
- To report back on progress within a year.

**Motion to be moved by: Cllr Martin Fodor, Green Group**

**Date of submission: 27/10/2022**

## Plant Based solutions Motion

A motion for a debate at Bristol City Council on plant-based solutions.

This council:

Notes:

- A recent study found that it will be impossible for the EU to cut its methane emissions in line with what the science says is needed (45% reduction by 2030) without cutting emissions in the meat and dairy sector.[1]
- Producing a kilo of beef creates, on average, 12 times more CO2e than a kilo of tofu or other soya based proteins; [2]
- Producing a litre of dairy milk uses, on average, at least four times as much land as producing a litre of plant milk. [3]
- Savings to the NHS will come from healthier, plant-based diets. Sustain estimates that meat over-consumption costs the NHS directly £1.2 billion, and 45,000 deaths annually. [4]
- A 2018 Oxford University study concluded that adopting a plant-based diet is the single biggest thing we can do to reduce emissions.
- Henry Dimbleby, in the National Food Strategy concluded that a 30% reduction in meat consumption is necessary for future food security. The National Food Strategy also states that obesity alone accounts for 8% of annual health spend in the UK, or £18bn. [4]
- In June 2021, the Committee on Climate Change (CCC) recommended that the consumption of beef, lamb and dairy should be reduced by at least 20% by 2030.
- Sir David Attenborough has said that we 'must reduce our meat & dairy consumption for the sake of the planet', & that the planet 'simply cannot sustain billions of meat eaters'.
- That a growing number of councils have made a commitment to plant-based catering or a shift away from meat:
  - o Lewisham Borough Council - fully plant-based in all corporate events
  - o Enfield Borough Council - does not serve meat at any meetings or events
  - o Faversham Town Council - fully plant-based at events
  - o Hythe Town Council - fully plant-based at all council functions
  - o Leeds City Council - two meat free days per week in schools
  - o Oxfordshire County Council - fully plant-based in all meetings & events
  - o Cambridge City Council - fully plant-based at meetings & promoting PB at events

Believes:

- We should act in line with the One City Climate Strategy which identifies consumption in the city as the leading source of global heating emissions to be tackled;
- Without meat and dairy consumption, global farmland use could be reduced by more than 75% – an area equivalent to the US, China, European Union and Australia combined – and still feed the world. Loss of wild areas to agriculture is the leading cause of the current mass extinction of wildlife. [5]
- What we do with land is important from a climate perspective because of its 'opportunity cost'. If land wasn't being used for livestock farming it could be used for something that is beneficial for the climate, like reforestation, which removes carbon from the air.

Therefore Council Calls on the Mayor to:

- Write to the government supporting UK endorsement of the Plant Based Treaty and invite all Party Group Leaders to sign the letter

And asks Council officers to explore options to:

- Ensure that food provided at all council catered events and meetings is entirely plant-based, preferably using ingredients sourced from local food surplus organisations.
- Ensure that Council school meals services have plant-based menus available as part of their regular offer on at least two days per week
- Work on outreach to schools and young people to actively influence and inform of food choices and their impact on the environment, health and animal welfare.
- Encourage and empower students to make informed decisions about the food available in their school.
- Inspire, promote and support initiatives surrounding food growing, preparation and waste avoidance, especially as part of school and community projects.
- Recognise the benefit of sourcing food locally from producers who follow sustainable principles.
- Use City Council Civic events to promote and showcase plant-based food options, alongside displayed information about the climate benefits and relative cost of different protein/food sources.
- Ensure that there are plant-based food options available at all City Council run events which involve catering (ie minimum from at least one caterer), where reasonably possible.
- Ensure that when events occur on City Council open spaces, and where catering is provided, that plant-based options are available (ie minimum from at least one caterer), secured through the use of terms and conditions of hire (where reasonably possible).
- Secure through a contract specification when re-tendering for suppliers that plant-based food and drink options are to be available at kiosks on City Council open spaces and Council run cafes (where reasonably possible). Similarly when possible via future contract specification when re-tendering for suppliers for Council run cafes, specify that vegetable/legume rich plant-based options are listed prominently on menus, above non plant-based options in line with Flexitarian principles.
- Report back to Full Council regarding progress on the actions above.

## **Mobilise community investments to tackle climate change**

Full Council notes:

1. That this council unanimously declared a climate emergency in November 2018 following a Green Motion to Council
2. The motion committed the city to achieve net zero carbon impact by 2030 and there are now 9 years left to this target date
3. The council has been progressing a package of low carbon opportunities called City Leap since May 2018. City Leap is still subject to a procurement process since a new process was started in 2020.
4. A new low risk model called Community Municipal Investments [CMI] has been developed by Leeds University and Abundance Investments platform with UK Government and EU support. This had the support of 4 local authorities including Bristol City Council. [1]
5. This concept is proven to mobilise local and other investment and channels local savings into local projects with low risk and a modest return to investors [2] and after the first issue further calls can be automated.

Full Council believes:

1. That offering local savers a way to support the city's journey to carbon neutrality mobilises community engagement in the process of change, attracts significant sums for named projects, and should be developed. 72% of people want to lend savings to help councils develop Climate Emergency Plans [3]
2. That offering security and a modest rate of interest through municipal bonds is an established way to develop local infrastructure [4]. This could complement other projects such as the successful Bristol Energy Cooperative.
3. That CMIs can help us develop a series of practical projects for a low carbon transition now in partnership with others which will be popular with local savers.
4. The Mayor should prioritise CMIs as part of the package of investments that will create positive economic opportunities and carbon neutrality while building community wealth.
5. Bristol should join the other 3 pioneers of CMI in developing local opportunities for local investors [e.g. 5]

Full Council resolves:

1. To call on the Mayor to begin development of Community Municipal Investments for the city.
2. That the Mayor promote CMI as a way residents and institutions can be engaged and actively involved in contributing to a zero carbon city.
3. To request officers to identify carbon saving projects suited to CMI investment in conjunction with city partners.

**Motion to be moved by: Cllr Martin Fodor (Green Group)**

**Date of submission: 27/10/2022**

## **Support for a £15 minimum wage**

### Council notes:

1. Bristol City Council is proudly a Living Wage Employer. However, as of 19 October 2022, UK inflation has risen 10.1% in 12 months. As a result, the Living Wage no longer meets the true cost of living.
2. 14.5 million people in the UK are in poverty. 10% of full-time working-age adults are in poverty, rising to a third of working-age adults in families where there is only part-time work. These are the highest rates since records began. 90,000 people a year die in poverty in the UK.
3. Higher minimum wages and empowered trade unions are essential to securing a high standard of living for all.

### Council resolves:

1. To support the introduction of a minimum wage of at least £15 an hour, for all workers no matter their age, to help tackle the cost of living crisis;
2. To support all trade union campaigns for £15 an hour, and stand in solidarity with them in fighting for higher wages and working conditions;
3. To support a raise in the minimum wage of council employed staff to £15 per hour by the 2024 financial year;
4. To lobby central government for the funding required to meet this rise;
5. To look into supporting this rise through a reduction in the salaries of the highest earning staff;
6. To strongly encourage all suppliers to Bristol City Council to pay their staff a minimum of £15 per hour by the 2024 financial year;
7. To use the power and influence of Bristol City Council to encourage all employers, especially the major employers within the city, to pay their staff a minimum of £15 per hour by the 2024 financial year.

**Motion proposed by Councillor Barry Parsons (Green Group)**

**Motion submitted 27/10/2022**

## Energy Crisis and Cost of Living

Full Council notes that:

1. We must take action to address the energy crisis and its impact on fuel poverty especially when the energy price cap rises again in January 2023.
2. We must be ready to protect our citizen from this crisis which will plunge people into poverty at no fault of their own.
3. We must protect the most vulnerable in our community who may be left out.
4. We must support the volunteers and action groups who will offer their help, with a well organised and well-informed action plan.
5. That this is a huge problem that needs to be addressed and that having a actionable plan by this winter may not be conceivable. However, this problem is not going away.
6. There is a strong link between lifting people out of poverty and making real terms cost savings, especially in education, welfare, and criminal justice.
7. If you convince people who can afford implementing energy saving actions that are cost neutral, a model to facilitate change is created that can then be funded for lower income homes in the future.

Full Council believes that:

1. Support for households so far is very welcome - but it simply does not go far enough. Leaving people in a position where they need to decide on eating or heating.
2. People are struggling to pay their bills and intervention is needed immediately.
3. The support so far has not extended to businesses, schools, and other public institutions such as hospitals and care homes, who will not be able to afford electricity therefore either going under or seeing periods of closures.
4. Bristol is fortunate in having the Bristol Energy Network (BEN) which has the skills and expertise to resurrect their approaches around education and support outlined in the resolution.

Full Council Resolves to:

1. Work with WECA and the Skills and Carbon Reduction Initiative (under the green recovery fund) to seek funding for a direct-action campaign with the "No Cold Homes" Bristol partnership including Bristol Energy network.
2. Work with BEN and the No Cold Homes partnership to support them in delivering their programme of education and 'DIY' approach to low cost, impactful measures open to homeowners and tenants. (e.g. draft-proofing, perplex secondary glazing etc).
3. In conjunction with Bristol's energy suppliers to develop a campaign to encourage take up for those not claiming the Government's Warm Homes Discount, which will open again in Nov 2022.
4. Provide a dedicated tab and a web page on the Cost-of-Living Hub, with regularly updated details of all support available, including details of the Warm / Welcome Spaces Programme
5. Work with Bristol's energy suppliers to widely advertise the discounts and grants available to fixed or low-income Bristolians.

**Motion proposed by Councillor Lisa Stone (Green Group)**

**Motion submitted 27.10.2022**

Notes:

Reference - Warm Home Discount Scheme: Overview - GOV.UK ([www.gov.uk](http://www.gov.uk))

About Us - Enough is Enough ([wesayenough.co.uk](http://wesayenough.co.uk))

The warm home discount scheme: if you live in England and Wales, you qualify if you either:

- get the Guarantee Credit element of Pension Credit - known as 'core group 1'
- are on a low income and have high energy costs - known as 'core group 2'
