Equality Impact Assessment [version 2.10]

| Title: R27 Restructure Finance Division | |
|---|---|
| ☑ Budget Proposal | ☑ New □ Already exists / review □ Changing |
| Directorate: Resources | Lead Officer name: Denise Murray |
| Service Area: All services in finance | Lead Officer role: Director of Finance (s151 Officer) |
| division | |

Step 1: What do we want to do?

The purpose of an Equality Impact Assessment is to assist decision makers in understanding the impact of proposals as part of their duties under the Equality Act 2010. Detailed guidance to support completion can be found here Equality Impact Assessments (EqIA) (sharepoint.com).

This assessment should be started at the beginning of the process by someone with a good knowledge of the proposal and service area, and sufficient influence over the proposal. It is good practice to take a team approach to completing the equality impact assessment. Please contact the <u>Equality and Inclusion Team</u> early for advice and feedback.

1.1 What are the aims and objectives/purpose of this proposal?

Briefly explain the purpose of the proposal and why it is needed. Describe who it is aimed at and the intended aims / outcomes. Where known also summarise the key actions you plan to undertake. Please use <u>plain English</u>, avoiding jargon and acronyms. Equality Impact Assessments are viewed by a wide range of people including decision-makers and the wider public.

Budget context

Every year, the council must agree an annual budget which balances the money we spend with the money we are expecting to receive. Councils across the country are facing financial challenges and based on our current forecasts, we face a funding gap over the next five years (to 2027/28) of up to £87.6 million dependent on the severity of factors such as rising costs of fuel, energy and inflation. This is in addition to the £34.3 million of savings and efficiencies proposals for 2022-2027 outlined in the 2022/23 budget.

The Council has defined statutory responsibilities, but deliver against a far broader agenda, providing universal services benefiting the whole community, and targeted services aimed at individuals, communities with particular needs, and businesses – administered by our workforce, city partners, stakeholder organisations and commissioned services.

To address these challenges we must look again across all of our services to find where we can do things differently to reduce costs, be more efficient in how we do things and, in some cases, stop doing some things entirely.

This proposal

The proposal is to undertake a review of the structures within the Finance division to support a smaller organisation.

The services within this remit include:

- Internal Audit Services
- Procurement Services
- Revenues & Benefits Services
- Accountancy, Risk & Insurance Service

This proposal aims to reduce the initial 23/24 budget for these services in total by £998k.

The aspiration is to achieve this through restructure to release vacancies and review of core vs non-core service provision to the organisation in the first instance. A priority is to ensure we can meet our regulatory responsibilities and maintain the appropriate stewardship and governance of the council's finances and minimise the council's exposure to risk. While not ruled out it is hoped to avoid the need for either voluntary or compulsory redundancies by taking a more flexible approach to resource deployment.

1.2 Who will the proposal have the potential to affect?

| ☑ Bristol City Council workforce | ☐ Service users | ☐ The wider community | |
|--|-------------------------|-----------------------|--|
| ☐ Commissioned services | ☐ City partners / Stake | eholder organisations | |
| Additional comments: This will directly impact the workforce within the teams, however there will be | | | |
| changes to the structure of the teams and the financial support on offer to the wider organisation and | | | |
| specific projects. | | | |

1.3 Will the proposal have an equality impact?

| ☐ No ☐ Yes [please select] | |
|--|--|
|--|--|

Could the proposal affect access levels of representation or participation in a service, or does it have the potential to change e.g. quality of life: health, education, or standard of living etc.?

If 'No' explain why you are sure there will be no equality impact, then skip steps 2-4 and request review by Equality and Inclusion Team.

If 'Yes' complete the rest of this assessment, or if you plan to complete the assessment at a later stage please state this clearly here and request review by the Equality and Inclusion Team.

Step 2: What information do we have?

2.1 What data or evidence is there which tells us who is, or could be affected?

Please use this section to demonstrate an understanding of who could be affected by the proposal. Include general population data where appropriate, and information about people who will be affected with particular reference to protected and other relevant characteristics: <u>How we measure equality and diversity (bristol.gov.uk)</u>

Use one row for each evidence source and say which characteristic(s) it relates to. You can include a mix of qualitative and quantitative data e.g. from national or local research, available data or previous consultations and engagement activities.

Outline whether there is any over or under representation of equality groups within relevant services - don't forget to benchmark to the local population where appropriate. Links to available data and reports are here Data, statistics and intelligence (sharepoint.com). See also: Bristol Open Data (Quality of Life, Census etc.); Joint Strategic Needs Assessment (JSNA); Ward Statistical Profiles.

For workforce / management of change proposals you will need to look at the diversity of the affected teams using available evidence such as HR Analytics: Power BI Reports (sharepoint.com) which shows the diversity profile of council teams and service areas. Identify any over or under-representation compared with Bristol economically active citizens for different characteristics. Additional sources of useful workforce evidence include the <a href="https://employee-burlet: Employee-burlet: Employee

| Data / Evidence Source | Summary of what this to | ells us |
|--|--|--|
| [Include a reference where known] | | |
| Census 2011 and Census 2021 2011 Census Key Statistics About Equalities Communities | The Census details the demographic profile of Bristol. We have had initial data on the population of Bristol by age, ethnic group, national identity, language, and religion, but are still awaiting more detailed results and multivariate data, so demographic data is still largely informed by 2011 census and other population related documents (listed below) | |
| The population of Bristol Bristol Key Facts 2022 | Updated annually. The report brings together statistics on the current estimated population of Bristol, recent trends in population, future projections and looks at the key characteristics | |
| Ward profile data (bristol.gov.uk) | of the people living in Bristol. The Ward Profiles provide a range of data-sets, including population, life expectancy, health and education disparities etc. for each of Bristol's electoral wards. | |
| Bristol Quality of Life Survey 2021-22 | The Quality of Life (QoL) survey is an annual randomised sample survey of the Bristol population, mailed to 33,000 households (with online & paper options), and some additional targeting to boost numbers from low responding groups. In brief, the most recent QoL survey indicated that inequality and deprivation continue to affect people's experience in almost every element measured by the survey. The Quality of Life 2021/22 data dashboard highlights those indicators, wards and equality and demographic groups which are better or worse than the Bristol average. For example there are significant disparities based on people's characteristics and circumstances in the extent to which they find it difficult to manage financially: | |
| | Quality of Life Indicator 16 to 24 years 50 years and older 65 years and older Female | % who find it difficult to manage financially 12.5 6.7 3.2 8.6 |
| | Male | 8.5 |

<u>Joint Strategic Needs Assessment</u> (<u>JSNA</u>)

The Joint Strategic Needs Assessment reports on the health and wellbeing needs of the people of Bristol. It brings together detailed information on local health and wellbeing needs and looks ahead at emerging challenges and projected future needs. The JSNA is used to provide a comprehensive picture of the health and wellbeing needs of Bristol (now and in the future); to inform decisions about how we design, commission and deliver services, and also about how the urban environment is planned and managed; to improve and protect health and wellbeing outcomes across the city while reducing health inequalities; and to provide partner organisations with information on the changing health and wellbeing needs of Bristol, at a local level, to support better service delivery.

Equality and Inclusion annual progress report 2021-22 (bristol.gov.uk)

Appendix – Workforce Diversity Data – summary analysis

The Workforce Diversity Report shows Bristol City Council Workforce Diversity statistics for Headcount, Sickness, Starters and Leavers data. The report is updated once a month with data as at the end of the previous month. It excludes data for locally managed schools/nurseries, councillors, casual, seasonal and external agency employees. The report is based on the sensitive information that staff add to Employee Self Service on iTrent (ESS).

Additional sources of useful workforce evidence include the Employee Staff Survey Report and Stress Risk Assessment Form completed by individuals and teams [internal links only]

Summary of Bristol City Council workforce diversity

| | Finance | BCC | |
|--------------------------|----------|-----------|---------------------|
| | Division | headcount | Bristol Working Age |
| | % | % | Population (16-64) |
| Age 16-29 | 6.9% | 12.2% | 39.0% |
| Age 30-39 | 17.7% | 22.0% | 24.0% |
| Age 40-49 | 26.2% | 24.4% | 16.0% |
| Age 50-64 | 49.2% | 41.4% | 21.0% |
| Age 65+ | - | 3.4% | - |
| Disabled | 8.1% | 9.0% | 12% |
| Asian / Asian British | 5.0% | 2.9% | 5.8% |
| Black / Black British | 6.5% | 5.1% | 5.3% |
| Mixed ethnicity | 1.9% | 3.6% | 2.9% |
| Other ethnic groups | 0.0% | 0.4% | 1.0% |
| White | 79.2% | 79.8% | 85.0% |
| Female | 54.6% | 60.1% | 49.0% |
| Male | 45.0% | 39.3% | 51.0% |
| Use another gender term | 0.0% | 0.2% | - |
| Christian | 32.3% | 25.9% | 43.5% |
| Other religion/belief | 4.6% | 6.6% | 7.3% |
| No religion/belief | 38.1% | 41.9% | 41.5% |
| Lesbian, Gay or Bisexual | 1.5% | 5.9% | 9.1% |
| Trans | 0.4% | 0.1% | - |

- Older employees are overrepresented in the Finance division overall and there are some variations in particular services:
 - o Internal Audit Services 17% of employees are Disabled
 - Procurement and Contract management a higher proportion of Asian/Asian British employees and employees from non-Christian faith groups
 - o Revenues & Benefits Services reflects Finance overall
 - Accountancy, Risk & Insurance Service 60% female, and a higher proportion of Asian/Asian British employees

Nomis - Official Labour Market Statistics (nomisweb.co.uk)

<u>Business demography, UK - Office</u> <u>for National Statistics (ons.gov.uk)</u> 84% of all people in Bristol are economically active which is higher than nationally (78.6%) and in the South West (80.7%). Of economically active people in Bristol 6.9% are self-employed, compared to 9.5% nationally. Of those who are economically inactive in Bristol, 33% are Students, 29% are 'long-term sick' and 16% are looking after family/home, as well as 9.2% who are retired. The percentage of 'workless households' in Bristol is 12.1%, compared to 13.6% nationally, and the proportion of working age people who are benefit claimants is 11.2%. Bristol has a higher proportion of people working in 'professional occupations' (36.2) than for the South West (24.4%) and nationally (25.8%).

In 2020 (most recent data) the South West continued to have the highest five-year 'survival rate' in the UK of businesses that survived into 2020 (this has been the case since 2012). The largest

| Bristol One City: Cost of Living Crisis | | | |
|--|--|--|--|
| Bristol's One City approach to | | | |
| supporting citizens and communities | | | |
| (Oct 2022) | | | |

Cost of Living Risk Index (arcgis.com)

proportion of these surviving businesses, 22%, was in the professional, scientific and technical industry.

The rising cost of living is not impacting on everyone equally. People who are already experiencing inequity and poverty will be disproportionately impacted:

- People on the lowest incomes will have less available income but also pay more for the same services. For example, people unable to pay their bills by Direct Debit and those borrowing money are subject to higher costs and interest rates. This is what anti-poverty campaign group Fair by Design has referred to as a Poverty Premium
- Households with pre-payment energy meters households
 with pre-payment meters often pay above-average costs for
 their fuel. They will face a significant rise in their monthly bills in
 autumn and winter with increased energy usage as they do not
 benefit from the "smoothing" effect of Direct Debits, which
 spread usage costs evenly across the year
- Parents and young families parents of young children are more likely to seek credit and alternative support as they are less able, on average, to afford an unexpected expense. Single parents will be disproportionately affected; and one in four single parents find it difficult to manage financially (28.6%).
- Disabled people just under half of all people in poverty in the UK are Disabled people or someone living with a Disabled person. Disabled people have higher living costs, and tend to pay more for their heating, travel, food/diet, prescription payments, and specialist equipment. It is estimated that UK households that include Disabled children pay on average £600 more for their energy bills than an average household
- Black and Minoritised people A higher proportion of Black and minoritised ethnic groups reported finding it difficult to manage financially (14.9%) in 2021. In 2020 the Social Metrics Commission found that almost half of people living in a family in the UK where the head of the household is Black are in poverty. Age UK report that poverty among older Black and minoritised ethnic groups is twice as high as for white pensioners
- People in rented accommodation it is estimated that 69% of low-income private renters in England will be forced to go without food and heating at least one day per week to meet rising housing and living cost. Almost three in ten homes in Bristol are privately rented
- Underserved populations It is likely that populations that are not typically well represented in data and research are likely to also face increased risk from rising cost of living. For example, refugees and asylum seekers, people experiencing homelessness, and Gypsy/Roma/Traveller groups.
- Cost of Living Risk Index (October 2022) identified Lawrence Hill, Hartcliffe & Withywood, Filwood, Lockleaze, Ashley, Southmead, Easton, Avonmouth & Lawrence Weston, Hillfields and Eastville as neighbourhoods in Bristol more at risk of the impact of the cost of living crisis.

<u>Delivering an inclusive economy post</u> <u>COVID-19</u> Report focusing on how co-production using a One City approach has been used to respond to the disproportionate impact of the Covid-19 pandemic on our marginalized ethnic communities.

Local research has highlighted how long-term underinvestment and lack of equity in funding and procurement has eroded the local Voluntary and community sector.

Our local partners have conducted research into the ongoing impact of COVID-19 for women and have provided recommendations on what service providers can do to reduce impact further impact.

2.2 Do you currently monitor relevant activity by the following protected characteristics?

| ⊠ Age | □ Disability | □ Gender Reassignment |
|----------------------|-----------------------|-----------------------|
| | ☑ Pregnancy/Maternity | ⊠ Race |
| ☑ Religion or Belief | ⊠ Sex | |

2.3 Are there any gaps in the evidence base?

Where there are gaps in the evidence, or you don't have enough information about some equality groups, include an equality action to find out in section 4.2 below. This doesn't mean that you can't complete the assessment without the information, but you need to follow up the action and if necessary, review the assessment later. If you are unable to fill in the gaps, then state this clearly with a justification.

For workforce related proposals all relevant characteristics may not be included in HR diversity reporting (e.g. pregnancy/maternity). For smaller teams diversity data may be redacted. A high proportion of not known/not disclosed may require an action to address under-reporting.

We also know there are some under-reporting gaps in our workforce diversity information - where personal and confidential information is voluntarily requested from staff.

2.4 How have you involved communities and groups that could be affected?

You will nearly always need to involve and consult with internal and external stakeholders during your assessment. The extent of the engagement will depend on the nature of the proposal or change. This should usually include individuals and groups representing different relevant protected characteristics. Please include details of any completed engagement and consultation and how representative this had been of Bristol's diverse communities.

Include the main findings of any engagement and consultation in Section 2.1 above.

If you are managing a workforce change process or restructure please refer to <u>Managing change or restructure</u> (<u>sharepoint.com</u>) for advice on consulting with employees etc. Relevant stakeholders for engagement about workforce changes may include e.g. staff-led groups and trades unions as well as affected staff.

We launched a public consultation on our budget proposals between Friday 11 November and Friday 23 December. This consultation set out all the savings proposals we had identified to produce a balanced budget in the context of reduced available funding and increasing financial pressures.

2.5 How will engagement with stakeholders continue?

Explain how you will continue to engage with stakeholders throughout the course of planning and delivery. Please describe where more engagement and consultation is required and set out how you intend to undertake it. Include any targeted work to seek the views of under-represented groups. If you do not intend to undertake it, please set out your justification. You can ask the Equality and Inclusion Team for help in targeting particular groups.

All responses to the Budget Consultation will be analysed and included in the Council's Budget report that will be published on the Bristol City Council website in early 2023. We will take Budget consultation responses into account when developing this and other final proposals to put to the Cabinet and a meeting of Full Council for approval. The final decision will be taken by Full Council at its budget setting meeting in February / March 2023.

Following the setting of the overall budget envelope there will be extensive engagement, consultation and co-design with affected communities on particular proposals which will inform future decision making prior to implementation. Our approach to public engagement and consultation will proactively target under-represented respondents to increase the participation of people from equality groups and their local representative organisations. This will help to ensure that our services and actions are informed by the views and needs of all our citizens.

Workforce mitigations are being considered in a separate overarching 'All Workforce Aspect' Budget EQIA, and there would be a separate Management of Change process and EQIA for subsequent restructures after review.

Step 3: Who might the proposal impact?

Analysis of impacts must be rigorous. Please demonstrate your analysis of any impacts of the proposal in this section, referring to evidence you have gathered above, and the characteristics protected by the Equality Act 2010. Also include details of existing issues for particular groups that you are aware of and are seeking to address or mitigate through this proposal. See detailed guidance documents for advice on identifying potential impacts etc. Equality Impact Assessments (EqIA) (sharepoint.com)

3.1 Does the proposal have any potentially adverse impacts on people based on their protected or other relevant characteristics?

Consider sub-categories (different kinds of disability, ethnic background etc.) and how people with combined characteristics (e.g. young women) might have particular needs or experience particular kinds of disadvantage.

Where mitigations indicate a follow-on action, include this in the 'Action Plan' Section 4.2 below.

GENERAL COMMENTS (highlight any potential issues that might impact all or many groups)

The Council has a corporate objective to right-size and streamline non-statutory requirements. The structure review undertaken is based on the anticipated level of project / non-core work that requires financial support at the present time. This non-core work often enables us to improve our ability to recruit, particularly individuals in the younger age categories who typically would be looking for development and diverse opportunities to add to their CVs. Should the non-statutory services reduce significantly more this structure proposal will require further review and revision to reflect the reducing need of the Council for finance resources on non-core work. We would look to do this in conjunction with the work that we undertake through our strategic partner in order to minimise any negative impact from the changed remit.

At this early budget setting stage we have considered the demographic make-up of the relevant teams, considering their protected characteristics, and how changes will impact representation across the team. Currently the key challenge in terms of diversity in the team is the workforce age profile, where we have currently a heavy reliance on the >50 year old age profile of staffing and an underrepresented 16-29 age range.

Even when we plan to consult in more detail on specific service delivery proposals at a later time, we must ensure that any budget setting decisions that are likely to affect future services are informed by sufficient

consultation and proper analysis. This is so that decision makers can have due regard to any likely disproportionate or negative impact on the basis of their protected and other relevant characteristics at the time the budget is approved – not afterwards¹.

Decision makers will have the ability to make changes to the individual spending plans following further consultation as appropriate and detailed evaluation of the impact of specific proposals. Within the proposed budget envelope there will be financial mitigation put aside for any non-delivery or amendments to proposals which may occur due to future consideration of equalities issues or other factors.

As well as identifying whether budget changes will have a disproportionate impact on particular groups (e.g., because they are over-represented in a particular cohort), we need to pay particular attention to the risk of indirect discrimination: when an apparently neutral decision puts members of a given group at a particular disadvantage compared with other people because of their different needs and circumstances.

We are also aware of existing structural inequalities and particular considerations, issues, and disparities for people in Bristol based on their characteristics, which we will take into account.

| for people in Bristol ba | ased on their characteristics, which we will take into account. |
|--------------------------|---|
| PROTECTED CHARACTER | RISTICS |
| Age: Young People | Does your analysis indicate a disproportionate impact? Yes ⊠ No □ |
| Potential impacts: | Young people are often under-represented in Finance services as employees. Children and young people in Bristol are considerably more ethnically diverse than the overall population of Bristol. 6.8% of 16-17 year olds (2020/21) were "not in education, employment or training" (NEET), worse than the national average (5.5%) Young adults are most likely to have lost work or seen their income drop because of COVID-19 and the cost of living crisis |
| Mitigations: | See general comments above |
| Age: Older People | Does your analysis indicate a disproportionate impact? Yes $oxtimes$ No $oxtimes$ |
| Potential impacts: | As above – older employees are overrepresented as employees across Finance services We must factor aging and the needs of older people into long term budgeting and service design |
| Mitigations: | See general comments above |
| Disability | Does your analysis indicate a disproportionate impact? Yes ⊠ No □ |
| Potential impacts: | 17% of Bristol's population are disabled. There are more disabled women than men living in Bristol. In 2021, the disability pay gap was 13.8% with disabled employees earning a median of £12.10 per hour and non-disabled employees a median of £14.03 per hour. Disabled people are less likely to be employed in a managerial or professional occupation the national disability employment rate was 52.7% in Q2 2021, compared to 81.0% for non-disabled people. Disabled workers move out of work at nearly twice the rate (8.8%) of non-disabled workers (4.9%). Workless disabled people move into work at nearly one-third of the rate (11.0%) of workless non-disabled people (26.9%) Disability increases with age: 4.1% of all children, for the working age population it increases to 12.3% and for people aged 65 and over it increases to 55.9%. Disabled people on average have lower qualification levels than the population as a whole. Budget setting needs to provide sufficient resource and flexibility to meet our legal duty to make anticipatory and responsive reasonable adjustments for disabled people including: changing the way things are done e.g. opening / working times; |

| | changes to overcome barriers created by the physical features of premises. |
|-----------------------|--|
| | prefines. providing auxiliary aids e.g. extra equipment or a different or additional service. |
| | is 'anticipatory' so we must think in advance and ongoing about what disabled people might reasonably need. |
| | Disabled people must not be charged for their reasonable adjustments, accessible |
| | formats or other adaptations. It is a legal requirement under the Equalities Act to |
| | ensure information is accessible to disabled employees and service users. |
| Mitigations: | See general comments above |
| Sex | Does your analysis indicate a disproportionate impact? Yes ⊠ No □ |
| Potential impacts: | The average UK pay gap is 15.4% in favour of men. The South West average is |
| | 16.6% with women paid 83p for every £1 earned by male counterparts. |
| | Women still bear the majority of caring responsibilities for both children and older |
| | relatives. |
| | Women are more likely to be excluded from conversations which affect decision |
| | making due to lack of representation in boards / organisational leadership. |
| Mitigations: | See general comments above |
| Sexual orientation | Does your analysis indicate a disproportionate impact? Yes ⊠ No □ |
| Potential impacts: | • 1 in 5 Lesbian, Gay, Bisexual and Trans (LGBT+) staff have been the target |
| l oteritial impacts. | of negative comments or conduct from work colleagues in the last year because |
| | they're LGBT+. |
| | More than a third of staff have hidden or disguised that they're LGBT at work in |
| | the last year because they were afraid of discrimination. |
| Mitigations: | See general comments above |
| Pregnancy / Maternity | Does your analysis indicate a disproportionate impact? Yes $oxtimes$ No $oxtimes$ |
| Potential impacts: | The Equality Act 2010 applies to those who are pregnant or have given birth in the past 26 weeks, as well as making provisions to protect rights for breastfeeding. Around 80% of women will give birth and many women will also experience termination, miscarriage and stillbirth In the workplace we need to ensure equal access to recruitment, personal |
| | development, promotion and retention for employees who are pregnant or on |
| | maternity leave (including briefing and updates for any workforce changes) |
| Mitigations: | See general comments above |
| Gender reassignment | Does your analysis indicate a disproportionate impact? Yes □ No □ |
| Potential impacts: | As sexual orientation above trans people are statistically more vulnerable to |
| | verbal and physical abuse. Trans people regularly face prejudice |
| | and discrimination because of the way in which they transgress many of the |
| | norms of our culture and society. |
| | 1 in 8 trans people (12%) in the workplace have been physically attacked by systemers or colleggues in the last year because they were trans. |
| Mitigations: | customers or colleagues in the last year because they were trans See general comments above |
| Race | Does your analysis indicate a disproportionate impact? Yes ⊠ No □ |
| Potential impacts: | Ethnic minorities in Bristol experience greater disadvantage than in England and |
| rotential impacts. | Wales as a whole in education and employment and this is particularly so for Black African people ² . |
| | Although the race or ethnicity pay gap has narrowed in recent years there are still wide pay differences between particular ethnic groups and most minority ethnic groups earn less on average than White British people. |
| | Organisations may lack cultural competence because minoritised ethnic staff are under- represented. |
| | People from Black African, and Black Caribbean groups have persistently high levels of unemployment and almost all ethnic minority groups in Bristol experience employment inequality when compared to White British people. |

| Potential impacts: • There are at least 45 religions represented in Bristol. Approximately 1 in 20 people in Bristol are Muslim, and Islam is the second religion in Bristol after Christianity • Budget proposals should take into account differing needs because of people's religion and belief (for example different requirements around diet, life events, and holidays) • Having a designated multi-faith room can make environments such as workplaces and shopping centres is more accessible and friendly for people from faith groups where regular prayer is required. Mitigations: See general comments above Marriage & Does your analysis indicate a disproportionate impact? Yes □ No □ CHER RELEVANT CHARACTERISTICS Socio-Economic (deprivation) Potential impacts: Bristol has 41 areas in the most deprived 10% in England, including 3 in the most deprived 1%. The greatest levels of deprivation are in Hartcliffe & Withywood, Filwood and Lawrence Hill. • In Bristol 15% of residents - 70,800 people - live in the 10% most deprived areas in England, including 19,000 children and 7,800 older people. Mitigations: See general comments above Carers Does your analysis indicate a disproportionate impact? Yes □ No □ Potential impacts: Being a carer can be a huge barrier to accessing services and maintaining employment • Studies show around 65% of adults have provided unpaid care for a loved one. • Women have a 50% likelihood of being an unpaid carer by the age of 46 (by age 57 for men) • Young carers are often hidden and may not recognise themselves as carers. Mitigations: See general comments above Other groups [Please add additional rows below to detail the impact for other relevant groups as appropriate e.g. Asylums and Refugees; Looked after Children / Care Leavers; Homelessness] | | |
|---|------------------------------|---|
| Mitigations: Religion or Religion or Belief Potential impacts: There are at least 45 religions represented in Bristol. Approximately 1 in 20 people in Bristol are Muslim, and Islam is the second religion in Bristol after Christianity. Budget proposals should take into account differing needs because of people's religion and belief (for example different requirements around diet, life events, and holidays) Having a designated multi-faith room can make environments such as workplaces and shopping centres is more accessible and friendly for people from faith groups where regular prayer is required. See general comments above Marriage & Could partnership Potential impacts: Mitigations: Does your analysis indicate a disproportionate impact? Yes □ No ☑ Counter Relevant Characteristics Socio-Economic (deprivation) Potential impacts: Bristol has 41 areas in the most deprived 10% in England, including 3 in the most deprived 1%. The greatest levels of deprivation are in Hartcliffe & Withywood, Filwood and Lawrence Hill. In Bristol 15% of residents - 70,800 people - live in the 10% most deprived areas in England, including 19,000 children and 7,800 older people. 3.2 Does the proposal create any benefits for people based on their protected or other relevant characteristics?

Outline any potential benefits of the proposal and how they can be maximised. Identify how the proposal will support our <u>Public Sector Equality Duty</u> to:

- ✓ Eliminate unlawful discrimination for a protected group
- ✓ Advance equality of opportunity between people who share a protected characteristic and those who don't
- ✓ Foster good relations between people who share a protected characteristic and those who don't

The scale of the potential gap in our core funding means that there is very limited opportunity to bring genuine additional benefit to equalities groups in the circumstances. However we have considered as far

as possible the need to: eliminate discrimination, harassment, victimisation and any other conduct prohibited under the Equality Act 2010; advance equality of opportunity between people from different groups; and foster good relations between people from different groups.

Our budget savings proposals are aligned to our Corporate Strategy and although we have limited resources our future focus will be on achieving those priorities we have identified including tackling poverty and intergenerational inequality.

The structure review aims to enable us to address existing age disparity in the Finance division partly by ensuring we can progress with recruitment to our significant vacancy levels, but also by revising the current Senior Accountant and Principal Account roles into one career graded Group Accountant post. As well as supporting our grow-your-own aspirations and enabling greater resilience in terms of succession planning, enabling recruitment of part / newly qualified post holders is anticipated to bring our age profile down and improve the balance.

Step 4: Impact

4.1 How has the equality impact assessment informed or changed the proposal?

What are the main conclusions of this assessment? Use this section to provide an overview of your findings. This summary can be included in decision pathway reports etc.

If you have identified any significant negative impacts which cannot be mitigated, provide a justification showing how the proposal is proportionate, necessary, and appropriate despite this.

Summary of significant negative impacts and how they can be mitigated or justified:

No significant negative impacts identified at this stage. Workforce changes may disproportionately impact older employees

Summary of positive impacts / opportunities to promote the Public Sector Equality Duty:

The structure review aims to enable us to address existing age disparity in the Finance division partly by ensuring we can progress with recruitment to our significant vacancy levels.

4.2 Action Plan

Use this section to set out any actions you have identified to improve data, mitigate issues, or maximise opportunities etc. If an action is to meet the needs of a particular protected group please specify this.

| Improvement / action required | Responsible Officer | Timescale |
|---|---------------------|-----------|
| All relevant EqIAs will be published on the Council's website | | |
| https://www.bristol.gov.uk/council-spending- | | |
| performance/council-budgets and continue to be updated as | | |
| appropriate. | | |

4.3 How will the impact of your proposal and actions be measured?

How will you know if you have been successful? Once the activity has been implemented this equality impact assessment should be periodically reviewed to make sure your changes have been effective your approach is still appropriate.

Our Equality and Inclusion Annual Progress Reports show what we have done to achieve the aims of our Equality and Inclusion policy and strategy, and the progress we have made including reporting on all relevant KPIs and workforce diversity <u>Equalities policy - bristol.gov.uk</u>

Continued review of the workforce diversity to assess success of our proposals in terms of the positive change to age diversity across the team.

The Equality and Inclusion Team need at least five working days to comment and feedback on your EqIA. EqIAs should only be marked as reviewed when they provide sufficient information for decision-makers on the equalities impact of the proposal. Please seek feedback and review from the <u>Equality and Inclusion Team</u> before requesting sign off from your Director¹.
