

PURPOSE: Key decision

MEETING: Cabinet

DATE: 07 March 2023

TITLE	City Regions Sustainable Transport Settlement – Maintenance and Integrated Transport Block Allocation 2023/24		
Ward(s)	Citywide		
Author: Adam Crowther	Job title: Head of City Transport		
Cabinet lead: Cllr Don Alexander, Cabinet Member Transport	Executive Director lead: Stephen Peacock, Executive Director Growth and Regeneration		
Proposal origin: BCC Staff			
Decision maker: Cabinet Member			
Decision forum: Cabinet			
Purpose of Report			
<ol style="list-style-type: none"> To approve the proposed maintenance and Integrated Transport Block (ITB) £8.272m funding allocations from West of England Combined Authority (WECA) as part of the City Region Sustainable Transport Settlement (CRSTS), and £1m internal funding, totalling £9.272m. To delegate authority to deliver the maintenance and ITB projects as necessary. 			
Evidence Base:			
<ol style="list-style-type: none"> The City Region Sustainable Transport Settlement (CRSTS) funding has been awarded to WECA by the Department of Transport to achieve significant change in the quality of the local transport network, particularly public transport. The key objectives of this funding are: <ul style="list-style-type: none"> to drive growth and productivity through investment in infrastructure, to increase the quality of services towards the standards of the best, to decarbonise transport, especially by promoting modal shift from cars to public transport, walking and cycling. <p>These objectives are all directly in line with the strategic and corporate objectives for Bristol City Council. More detail on strategic alignment of projects is shown in Appendix A.1</p> CRSTS covers a wide range of sustainable transport projects as well as covering maintenance and ITB. Approvals for the majority of CRSTS spend will be as required by each project through the appropriate decision pathways with WECA committee approval sought where necessary. This paper covers the annual maintenance and ITB allocations that is included in the overall CRSTS allocation and is passed by WECA to each authority to spend on appropriate measures. Same as last year, this funding replaces previous Transport Block funding streams including Integrated Transport Block, Highways Capital Maintenance Block and Highways Incentive Block. All works previously funded by these funding streams need to be delivered using this CRSTS funding. These are primarily statutory maintenance and replacement projects, or minor schemes and so do not require a business case to WECA. These projects are detailed in Appendix A.1, with additional information of their alignment with strategic priorities. The council understands any underspend at the end of the financial year can be rolled over into the next financial year, the grant allocation letter from WECA states “The West of England Combined Authority reserves the right to reclaim any grant remaining that has not been incurred or committed in the 2022/23 financial year. Any such repayments should be made within 28 days of the request.” Clarification on this matter is still being sought. £1m of central funding (internal prudential borrowing) has been assigned to support additional maintenance work as part of the capital investment strategy to improve council assets. This will be delivered alongside the 			

CRSTS funding and is included in Appendix A.1 as non-CRSTS funding.

6. Unlike last year, the CRSTS funding from the Challenge Fund pot to develop and deliver maintenance to bridges along the new cut is not included in this paper as this will be subject to a separate paper covering all years of funding.

Cabinet Member Recommendations:

That cabinet:

1. Note the proposed indicative funding allocations of £8.272m of WECA CRSTS maintenance and ITB and £1m internal funding, totalling £9.272m for 2023-2024.
2. Authorise the Executive Director Growth and Regeneration in consultation with the Cabinet Member for Transport to take all steps required to accept and spend up to £9.272m of WECA CRSTS maintenance, ITB, and local funding as outlined in this report. Legacy area committee schemes, where delivery has been delayed by various factors and budget originally set in previous year, are subject to sign off by the Mayor in line with the terms of reference of Area Committee operation
3. Note that the underspend from the financial year 2022-23 will be considered for carry forward as part of the overall capital outturn report.
4. Authorise the Executive Director Growth and Regeneration, in consultation with the Cabinet Member for Transport, to take all steps necessary to procure and award any contracts (including any contracts over the key decision threshold) necessary to deliver the works identified in Appendix A.1 as maintenance or minor works and any reaming works from last year; making use of existing term contracts and/or approved frameworks where appropriate, up to the budget ceiling identified in Appendix A.1.
5. Authorise the Executive Director Growth and Regeneration, in consultation with the Cabinet Member for Transport, to make reasonable changes to the programme of works to ensure delivery of the programme, in accordance with the Council's scheme of financial delegations

Corporate Strategy alignment:

1. The projects funded are within the Environment and Sustainability, and Transport and Connectivity Themes, with some secondary impacts on the Economy and Skills Theme.
2. Projects are associated with ENV1 Carbon Neutral, with decarbonisation as a key objective, and improvements to public transport networks being a key output in the Bristol One City Plan. Also improvements are aimed at increasing economic growth, as a key objective of the funding, and so will be aligned with ES1 Regeneration and ES2 Access to Employment, by increasing transport options between commercial centres and residential areas.
3. Maintenance funding will be provided for review of structures, directly aligned with TC4 Physical Infrastructure.
4. This funding includes transport business as usual, such as Safer streets around schools (directly referenced in the corporate strategy), Flood Surveys (directly aligned with ENV4 Climate Resilience) and Road Safety (directly aligned with TC3 Safe and Active Travel).

City Benefits:

1. The projects proposed to be delivered using this funding are critical to the success of the council's decarbonisation strategy and transport strategy. This investment will improve public transport infrastructure in Bristol, increasing connectivity and helping produce economic growth. It will help provide a comprehensive and reliable bus network and improve access to wider employment and training opportunities, including to the most deprived parts of the city and ensure that key city transport assets are appropriately maintained to benefit all users
2. Due to the type of projects, there may be negative environmental and equalities impacts that have to be considered and mitigated, particularly during construction. Mitigations will be sought and implemented where possible before delivery.

Consultation Details:

1. Public consultation will take place on projects individually at the point that it is required.
2. For maintenance schemes, consultation is often not required as there is no change to the physical asset being upgraded

Required information to be completed by Financial/Legal/ICT/ HR partners:

Finance Advice: The report seeks approval to accept and spend the annual CRSTS funding allocation towards the Councils Transport Block funding streams including Integrated Transport Block, Highways Capital Maintenance Block and Highways Incentive Block for 2023/24.

1. The transport capital programme for 2023/24 is estimated at £9.272m.
2. Funding for these schemes are from both the WECA administered CRSTS funding as well as the Council PB funding.
3. The maintenance programme for Transport has already received approval for prudential borrowing of £1m to fund maintenance and is added for completeness.

Finance Business Partner: Kayode Olagundoye, Interim Finance Business Partner, Growth & Regeneration, 31 January 2023

2. Legal Advice: The procurement process must be conducted in line with the 2015 Procurement Regulations and the Councils own procurement rules. Legal services will advise and assist officers with regard to the conduct of the procurement process and the resulting contractual arrangements.

Legal Team Leader: Husinara Jones, Team Manager/Solicitor. 17 January 2023

3. Implications on IT: I can see no implications on IT in regards to this activity.

IT Team Leader: Gavin Ar buckle Head of Service Improvement & Performance. 23 January 2023

4. HR Advice: There are no HR implications evident.

HR Partner: Celia Williams, HR Business Partner – Growth and Regeneration. 23 January 2023
