

## **Bristol Health & Wellbeing Board**

<b>Bristol JSNA 2016-17</b>	
Author, including organisation	Dr Joanna Copping Consultant in Public Health Medicine Bristol City Council  Nick Smith Strategic Intelligence and JSNA Manager Bristol City Council
Date of meeting	14 Dec 2016
Report for Information and Discussion	

### **1. Purpose of this Paper**

The purpose of this paper is to provide the Health and Wellbeing Board with a final draft of the Bristol JSNA Data Profile 2016-17 for endorsement, and to update on the progress of priority JSNA 2016-17 Chapters.

### **2. Executive Summary**

The JSNA Data Profile 2016/17 highlights the main health and wellbeing issues for Bristol. Although there have been some improvements in outcomes since the last report, and Bristol often performs well compared to other Core Cities, the significant inequalities within Bristol do not appear to be reducing.

Please see Executive Summary in Appendix A: JSNA Data Profile 2016/17 for further details.

### **3. Context**

JSNAs analyse current and future health needs of the population in order to develop local evidence based priorities for commissioning, to improve the public's health and reduce inequalities. Bristol City Council and Bristol Clinical Commissioning Group have equal and joint duties to prepare the JSNA through the Health and Wellbeing Board.

### **4. Main body of the report**

Please see Appendix A : JSNA Data Profile 2016/17

The JSNA 2016-17 Data Profile is a review of key health and wellbeing indicators across the city, for adults and children. It is an expanded version of the JSNA 2015 profile.

The JSNA Data Profile looks at how Bristol is performing compared to England and the other Core Cities and also the inequalities within Bristol. For this year some data has also been shown by gender. Data has not been broken down by ethnicity or by other equalities group as this is not routinely available.

In addition to the Data Profile, the JSNA process now includes the development of JSNA “Chapters” that look in more detail at specific priority topics. As well as the quantitative data, these chapters include details of current services, the evidence of effectiveness of interventions and stakeholder feedback in order to identify key issues and make recommendations for future action. There are 13 priority chapters in process and due to be published in early 2017.

The new priorities agreed for the refreshed Bristol Health and Wellbeing Strategy were informed by the JSNA Data Profile, as intended. The data in the 2016-17 update continues to highlight key issues for Bristol including the three priority areas of mental Health and wellbeing, alcohol misuse and healthy weight.

The JSNA Data Profile was also used to inform the Bristol, North Somerset and South Gloucestershire Sustainability and Transformation Plan (STP), the Bristol Corporate Strategy and the Bristol’s Strategy for Children, Young People & Families.

The development of the JSNA for Bristol is undertaken by the JSNA Working Group and overseen by the JSNA Steering Group which includes senior representation from the Council, the CCG, Healthwatch and Voscur.

## **5. Key risks and Opportunities**

The challenge is to ensure that the Health and Wellbeing Board and partners use the JSNA 2016-17 Data Profile, and JSNA Chapters, to shape strategic direction, commissioning and service delivery to improve health and wellbeing and reduce inequalities.

A further challenge is ensuring better access to the JSNA Data Profile and chapters through a JSNA website and also to the underlying data through the procurement of a council data platform.

## **6. Implications (Financial and Legal if appropriate)**

None

## **7. Evidence Informing this report.**

## **What evidence have you used to inform:**

- Evidence of need and the case for change (eg. **JSNA**, activity data, patient feedback, national directive etc)
- Evidence of effectiveness of proposed solution/initiative/new service

The JSNA is a key source of evidence of need. The new chapters will also include evidence of effectiveness.

## **8. Conclusions**

The JSNA 2016/17 data profile report highlights the changes to health and wellbeing indicators for Bristol, differences in health outcomes within Bristol, and emerging challenges. It needs to continue to inform local strategic direction, commissioning decisions and service delivery to improve health and wellbeing and reduce inequalities.

## **9. Recommendations**

The Health and Wellbeing Board are recommended to:

- a) Approve the Bristol JSNA Data Profile 2016/17
- b) Continue to champion the JSNA and ensure that both the JSNA Data Profile and the new chapters are fully utilised by all partners.

## **10. Appendices**

Appendix A: JSNA Data Profile 2016/17

Appendix B: JSNA priority chapters 2016/17
