

Bristol Health and Wellbeing Board

Title of Paper:	Good Food 2030
Author (including organisation):	Heloise Balme, Bristol Food Network
Date of Board meeting:	23 rd May 2024
Purpose:	Information and discussion

1. Executive Summary

Since the Health & Wellbeing Board and Environment Boards signed off the Bristol Good Food (BGF) 2030 Framework for Action last year, Bristol Food Network has been working with stakeholders to deliver projects, to bring new stakeholders into this work and to publish an initial set of indicators, which indicate progress against the BGF2030 goals.

2. Purpose of the Paper

To provide an update on BGF2030 activity that supports the One City Plan's Health & Wellbeing goals and Bristol's Public Health goals and to highlight opportunities for HWB members to support this work.

3. Community/stakeholder engagement

Stakeholders participate in BGF2030's quarterly Working Group meetings to review project progress and help shape new initiatives. New stakeholders are identified via ongoing Bristol Food Network meetings and discussion, and then invited to participate in Working Group meetings.

4. Recommendations

BGF2030 – both the Framework for Action and related projects - continue to be a point of reference for delivering food-related change within Bristol's health and integrated care systems.

5. City Benefits

Projects coordinated by the BGF2030 Partnership contribute to improving diet-related health outcomes for Bristol's citizens.
